

# Bernard Nkengbaza Ngangsic-Asongu

He/him

## Hometown

Townsend, Delaware.

## Major

Bachelor of Science in Biochemistry

## Why did you choose your major/What do you want to do with your degree?

I choose my major because I've always been surrounded by computers and I wanted to work with them. When I learned how much of our lives are reliant on computers, I realized the need society has for people to defend them and their data. So I decided to learn how to just that.

## What is your favorite thing about the Camras Scholars Program?

My favorite thing about the Camras Program is the tuition coverage.

## Where do you see yourself in 20 years?

I see myself working in cyber with the government. Perhaps with the CIA or FBI.

## Achievements that speaks about you as an individual and representative of this Scholarship Organization.

In my senior year of high school I was elected as secretary of my school's Technology Student Association chapter. Our school didn't give our chapter any money so we could never afford to travel to the national competition. I felt a responsibility to ensure that we could make national competition in Florida. I spent much of it participating and organizing various fundraisers, which all paid off when our chapter could finally represent our school in the national competition.
