

# Iasmi Siopsis

She/her

## Hometown

Maryville, Tennessee.

## Major

Bachelor of Science in Applied Math and Public Policy

## Why did you choose your major/What do you want to do with your degree?

I chose my majors because I wanted to have a well rounded background by having both a science and a social science. With this background, I hope to find a field of work that I can incorporate my math skills to help society (i.e. work with studying demographic models and bringing to light any issues within them).

## Where do you see yourself in 20 years?

At a well paying job, doing something meaningful to give back to people/community.

## What is your favorite thing about the Camras Scholars Program?

I enjoy participating in the Literacy Program which introduced me to a community I am happy to be a part of.

## Achievements that speaks about you as an individual and representative of this Scholarship Organization.

I have brought back the club Ethical Debaters in which we discuss Ethical Dilemmas. I am currently leading a team to go to conferences, and I am also working with the Vice Provost to bring Ethical debate to campus. Additionally, I am working on creating a Food and Culture club to learn and share about mine and other's cultures through sharing regional food.
