Amelie Yen

She/her

Hometown

Aurora, Illinois

Major

Bachelor of Science in Computer Science

Why did you choose your major/What do you want to do with your degree?

Ever since I could walk, I've had a deep fascination with computers, taking every computer-oriented class that I could throughout middle school and high school. I hope to use my degree to pursue a computer science career within the environmental science field, as the current state of the globe and environment is a huge concern of mine.

What is your favorite thing about the Camras Scholoars Program?

I love how the Camras Scholars Program enables me to connect with like-minded individuals.

Where do you see yourself in 20 years?

I see myself using CS to help make a difference in the world's environment.

How do you think you best represent what it means to be a Camras scholar?

As a community-oriented person, I highly value community service. I partake in a lot of local volunteer projects and events at places such as St. James Food Pantry, Hesed House, and other organizations, many of which aid people in getting day-to-day necessities.
