

Ayesha Mohiuddin

She/her

Hometown

Lombard, Illinois.

Major

Bachelor of Science in Psychology, specialization in Premedical Studies

Why did you choose your major/What do you want to do with your degree?

I am interested in possibly pursuing Psychiatry after medical school. I have long been interested in topics such as neuroscience and mental health, and have participated in many related opportunities in the past. Psychology is a major that allows me to further explore and develop my interests while also preparing for medical school.

What is your favorite thing about the Camras Scholars Program?

My favorite thing about the Camras Scholars Program is being able to form connections with similar-minded and very driven students across all different majors. The friendships I've formed through Camras have been great so far and I hope to get to know even more scholars and expand my network through this program!

Where do you see yourself in 20 years?

In 20 years, I see myself as a fulfilled and passionate physician, working hard to serve the needs of those in my community and beyond.

Achievements that speaks about you as an individual and representative of this Scholarship Organization.

I am co-leading my Pillar Project geared towards raising awareness and de-stigmatizing mental health. It is known as the Out of the Darkness Campus Walk. I am very excited to be working on this project and hope that it contributes positively to student life on and off campus!
