

# Elaine Bai

She/her

## Hometown

Lincoln, Nebraska.

## Major

Bachelor of Science in Astrophysics

## Why did you choose your major/What do you want to do with your degree?

Ever since my 7th grade year, I have always been fascinated with the stars and the heavens above. From there I realized I wanted to study Astrophysics for the rest of my life. My degree should facilitate my journey to graduate school which would eventually lead to a career in Academia.

## What is your favorite thing about the Camras Scholars Program?

The generosity and the leadership skills it gives to its scholars and the surrounding community.

## Where do you see yourself in 20 years?

20 years from now, I would start my career as an independent researcher in some University or as a government agent (I would have completed postdocs and graduate school by then).

## Achievements that speaks about you as an individual and representative of this Scholarship Organization.

I feel like I have yet to fully engage in my potential as a Camras scholar as of now. But I do feel that I have just finished some fairly difficult classes and had strong finish.
