

London Francis

She/her

Hometown

Jacksonville, Florida.

Major

Bachelor of Science in Forensic Chemistry with a Minor in Nutrition

Why did you choose your major/What do you want to do with your degree?

I'd like to work for a major government agency or police unit that deals with crime scene evidence, DNA analysis, and toxicology.

What is your favorite thing about the Camras Scholars Program?

My favorite thing about the Camras Scholars Program is the people. When doing Meeting people from so many different places and learning about all the experiences that we all had before entering college..

Where do you see yourself in 20 years?

Hopefully in a head position at the FBI headquarters, possibly working in the field and not just behind the scenes or in the laboratory.

Achievements that speaks about you as an individual and representative of this Scholarship Organization.

Perseverance. I've learned to manage both my academic and athletic schedules, and excel in them. I've been a scholar athlete since I've played volleyball and I plan on continuing this trend at the college level.
