

# Shreyas Suresh

He/him

## Hometown

Johns Creek, Georgia

## Major

Bachelor of Science in Aerospace Engineering

## Why did you choose your major/What do you want to do with your degree?

I have been passionate about space and space travel since before I started going to school.

## What is your favorite thing about the Camras Scholars Program?

The opportunity to impact those around me, which I have used alongside Cameron Bracewell to start a pillar project to improve our campus.

## Where do you see yourself in 20 years?

Working on rocket structures or playing the 2040s version of Super Smash Bros with my family.

## How do you think you best represent what it means to be a Camras scholar?

Cameron Bracewell, another Camras Scholar, and I co-founded Podium Pros, a pillar project and club combination that is intended to assist people in improving public speaking. We both could have benefitted from such an initiative in our lives, so we decided to make it.
