

Sophia Halama

She/her

Hometown

Hudson, Wisconsin.

Major

Bachelor of Architecture in Architecture with a minor in Sustainability

Why did you choose your major/What do you want to do with your degree?

I chose my major because when I was younger I always enjoyed building models and creating new things. Architecture influences many aspects of our day to day and I wanted to go into a career that would have a positive impact on people.

What is your favorite thing about the Camras Scholars Program?

The opportunity to connect with the Bronzeville community. This past semester I had the opportunity to read to a fifth grade class at a local elementary school. This is something I likely would not have gotten to participate in if this program did not exist.

Where do you see yourself in 20 years?

In 20 years I hope to be working in a firm in a big city (possibly Chicago) helping to design projects that have a positive impact on people and the environment.

Achievements that speaks about you as an individual and representative of this Scholarship Organization.

I was President of the club Students Against Destructive Decisions . We helped to create initiatives to help relieve the stress that students felt due to Covid and other aspects of high school. This included panel discussions and talks from guest visitors. I conducted a study about local food shelves and the nutritional values of food distributed as it correlates to the guidelines the food shelf was following.
