

# Adam Shalabi

He/him

## Hometown

Orland Park, Illinois.

## Major

Bachelor of Science in Biochemistry with a Minor in Pre-Medicine,

## Why did you choose your major/What do you want to do with your degree?

I chose biochemistry as my major because I love working in labs. Labs were definitely some of the highlights of any science-based classes I took in high school and I wanted to continue with that in college. After I graduate, it's my goal to continue on to medical school with the long-term goal of becoming a doctor. My hope is that my background in biochemistry will be very useful for developing and studying medicine!.

## What is your favorite thing about the Camras Scholars Program?

My favorite thing about Camras has been the opportunity for personal and professional development via pillar projects. I think the pillar projects are such a beneficial outlet for anyone at IIT with the hope of making a difference on campus!

## Where do you see yourself in 20 years?

I hope to see myself as an anesthesiologist who's an attending physician at the John H. Stroger, Jr. Hospital of Cook County where I can give back to my home town at the same hospital that's been serving my community before I was born.

## Achievements that speaks about you as an individual and representative of this Scholarship Organization.

I was the president of our Student Council. There were many projects our team was proud of, but my personal favorite achievement was our ability to raise over \$6,000 to install new carpets throughout our school.
