

Tri Phan

He/him

Hometown

Plainfield, Illinois

Major

Bachelor of Science in Computer Engineering and Cybersecurity

Why did you choose your major/What do you want to do with your degree?

I've always enjoyed building things with my hands ever since I was younger. After being introduced to computers at a young age, my love for technology started. This combined with my love of building lead me into computer engineering.

What is your favorite thing about the Camras Scholars Program?

I love being able to have the opportunity to join a community of individuals that not only strive to get good grades, but to actually make an impact on the world.

Where do you see yourself in 20 years?

I see myself doing research and innovating at companies in order to make a bigger and more positive impact on the world.

Achievements that speaks about you as an individual and representative of this Scholarship Organization.

I've always believed in giving back to my roots and helping those who once helped me. Immigrating over to America, my English wasn't very good, which lead me to being tutored in order to catch up to my peers. This showed me the value of providing good and meaningful education to kids, inspiring me to become a tutor, tutoring kids from all different backgrounds and seeing them thrive.
