Banner Finance Self-Service, configuration
Updated: August 27, 2020

The Finance Self-Service application enables your institution to deliver optimal customer service using the convenience, speed, and technology of the internet. The application gives users simplified access to information in your Banner Finance Self-Service system.

This documentation contains information about the My Finance Query, My Requisitions, My Journals, Purchase Orders, Approve Documents, Budget Development, and Delete Finance Template modules of the Finance Self-Service application.

My Finance Query
Updated: August 27, 2020

My Finance Query allows you to query and view your Finance budget data.

You can use this application for the following:

• Create a query to retrieve Finance budget data
• Edit a query
• Share a query with others in your organization having the same level of access
• Delete a query
• Mark a query as a favorite
• Perform comparison queries
• Add computed columns to queries
• Download query results to Excel
• View Document.
• View related documents
• View approval history

My Finance Query views
Updated: August 27, 2020

Queries have several views available.

### My Finance Query page

**Updated:** August 27, 2020

The My Finance Query page lists your budget query history including query favorites, saved queries, and shared queries.

The My Finance Query page serves as your home page. Use this page to create budget queries and review budget queries you have designated as favorites, saved, or shared with others.

You can also use the **Search Query** field to search for queries by supplying the full/partial name of the query. The Search Query feature can also be used in combination with the Filter functionality. This feature works on all the three tabs in the dashboard – Favorite Queries, Saved Queries, and Shared Queries.

### Filtering queries

Click ⬇️ to filter queries. You can filter queries by type:

- Budget
- Encumbrance
- Multi Year
- Payroll

You can also use the Low-High, High-Low arrows to filter queries based on budget size.

### My Finance Query tasks

**Updated:** August 27, 2020

This section contains the tasks you can perform using My Finance Query.

**Create a query**

**Updated:** August 27, 2020

To begin the query process, use the My Finance Query dashboard page to create a query.

**Before you begin**

You can create the following types of budget queries:
<table>
<thead>
<tr>
<th>Query Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Budget Status by Account</td>
<td>Budget information by accounts for the Fiscal Period, Year, and Commitment Type (all, committed, or uncommitted) by the following:</td>
</tr>
<tr>
<td></td>
<td>• FOAPAL/Index values</td>
</tr>
<tr>
<td></td>
<td>• Single Organization</td>
</tr>
<tr>
<td></td>
<td>• Fund Type</td>
</tr>
<tr>
<td></td>
<td>• Account Type</td>
</tr>
<tr>
<td></td>
<td>• Revenue Accounts</td>
</tr>
<tr>
<td></td>
<td>• Wild-card filters supported for FOAPAL</td>
</tr>
<tr>
<td>Budget Status by Organizational Hierarchy</td>
<td>Budget information for organizations by the following:</td>
</tr>
<tr>
<td></td>
<td>• Hierarchical structure</td>
</tr>
<tr>
<td></td>
<td>• Specific Funds, high-level Organizations, Accounts, and Programs</td>
</tr>
<tr>
<td></td>
<td>• Fund Type</td>
</tr>
<tr>
<td></td>
<td>• Account Type</td>
</tr>
<tr>
<td></td>
<td>• Revenue Accounts</td>
</tr>
<tr>
<td></td>
<td>• Wild-card filters supported for FOAPAL</td>
</tr>
<tr>
<td>Budget Quick Query</td>
<td>Current budget status and displays information similar to that available on the Organization Budget Status (FGIBDST) page.</td>
</tr>
<tr>
<td></td>
<td>When you choose this option, be aware of the following:</td>
</tr>
<tr>
<td></td>
<td>• Only one parameter page displays for this query. Ledger fields displayed include Adjusted Balance, Year to Date, Net Commitments, and Available Balance.</td>
</tr>
<tr>
<td></td>
<td>• Wild-card filters supported for FOAPAL</td>
</tr>
<tr>
<td></td>
<td>• You can enter the fiscal year. Data displayed will be through period 14.</td>
</tr>
<tr>
<td>Encumbrance Query</td>
<td>Budget information by encumbrance information for the Commitment Type (all, committed, or uncommitted), Encumbrance Status, and Fiscal Year and Period.</td>
</tr>
<tr>
<td>Multi Year Query</td>
<td>New Query type to support the current budget status by Grant which displays information similar to that available on the Grant Inception to Date (FRIGITD) in the admin application. Wild-card filters supported for FOAPAL.</td>
</tr>
<tr>
<td>Payroll Expense Detail</td>
<td>Allows you to review the entire payroll distribution data for the Fiscal year and Fiscal period by:</td>
</tr>
<tr>
<td></td>
<td>• FOAPAL/Index values</td>
</tr>
<tr>
<td>Query Type</td>
<td>Description</td>
</tr>
<tr>
<td>------------------</td>
<td>--------------------------------------------------</td>
</tr>
<tr>
<td>Single Organization</td>
<td></td>
</tr>
<tr>
<td>Fund Type</td>
<td></td>
</tr>
<tr>
<td>Account Type</td>
<td></td>
</tr>
<tr>
<td>Wild-card filters supported for FOAPAL</td>
<td></td>
</tr>
</tbody>
</table>

**Procedure**

1. On the **My Finance Query** page, click **New Query**.
2. On the **Create New Query** window, in the **Select Query Type** field, select the budget query type.
3. In the **Values** area, select the values and the Operating Ledger columns for which you want to query.
4. Click **SUBMIT**.
   
   **Result:** The query results display on the page. Using the available icon buttons, you can edit, share, save, view query parameters, add computed columns, download results to Excel, or view available balance, pending documents, and payroll (if applicable).

**Save a query and mark it as a Favorite**

**Updated:** August 27, 2020

You can save a query and mark it as a favorite.

**Procedure**

1. Create a query that you want to save.
   
   **Result:** The query results display on the page.

2. Click **Save as** to access the **Save as** window.

3. Enter a query name in the provided field.

4. If you want to set the query as a Favorite, select the **Set as favorite** check box.

5. Click **Save**.

   **Tip:** You can also use the star icon of a query displayed in the card view to toggle a query between Favorite and Unfavorite.

**Edit a query**

**Updated:** August 27, 2020

You can edit a query to adjust results.
Procedure

1. On the My Finance Query dashboard page, click the Saved or Shared query you want to edit.
   Result:
   - Clicking saved queries loads query results. Click to access the Edit Query window.
   - Clicking a shared query in the query list accesses the Edit Query window.
2. Using the Edit Query window, adjust the selections for the query.
3. Click SUBMIT.
   Result: The query results display on the page.

View available balance, pending documents, and payroll expense detail
Updated: August 27, 2020

You can view pending documents attached to a query. You can also view payroll expense detail.

Before you begin

Note: Payroll expense detail is available to users based on permission level access.

Procedure

1. View the query.
2. Click to access the options list.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>View available balance</td>
<td>The system presents with Available Balance information (similar to FGIBAVL in Admin) based on the query parameters and the Budget Control Keys configured.</td>
</tr>
<tr>
<td>View pending documents</td>
<td>The system presents a list of pending documents associated with the query.</td>
</tr>
<tr>
<td>View payroll</td>
<td>The system presents payroll information, based on your permission level.</td>
</tr>
</tbody>
</table>

Share a query
Updated: August 27, 2020

Sharing a query allows anyone in your organization who has the same level of access to see the query.

Procedure

1. On the My Finance Query dashboard page, locate the query you want to share in the Favorites or Saved areas.
2. Click ➡.

3. On the share prompt, choose the appropriate option.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>The system updates the query to Shared allowing others with the same level of access to see the query.</td>
</tr>
<tr>
<td>No</td>
<td>The system cancels the share.</td>
</tr>
</tbody>
</table>

Result: You will now see the 🔄 icon which indicates that the query has been shared.

4. You can click on 🔄 to unshare the query.

Tip: You can also perform the Share/UnShare operation, while running a query from the Query results listing page.

Download a query to Excel
Updated: August 27, 2020

You can download a query as an Excel spreadsheet.

Procedure

1. Create or view a query that you want to download.

2. Click ➡ to download the query to the default download location on your local drive.

Delete a query
Updated: August 27, 2020

You can delete saved queries.

Procedure

2. Locate the saved query you want to delete and click 📂.

3. On the delete prompt, choose the appropriate option.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>The system deletes the query.</td>
</tr>
<tr>
<td>No</td>
<td>The system cancels the delete.</td>
</tr>
</tbody>
</table>
Add computed column
Updated: August 27, 2020

You can add a computed column to query results.

About this task
Note: You can add a computed column to all query types except Budget Quick Query.

Procedure
1. Create or view the query to which you want to add a computed column.
2. Click to access the Computed Columns window.
3. Define the computed column by naming it and selecting the two columns and the operator controlling the new column's results.
4. Click Compute. Result: Query results reload listing the new computed column in the results.

What to do next
Tip: You can use the Remove tab to remove a previously added computed column from a query.

View a document – option 1
Updated: August 27, 2020

You can use these steps to view a document from the My Finance Query dashboard.

Procedure
1. Click on the dashboard.
2. Use the Document Type drop down field to select the appropriate document type.
3. Use the Document Search to look up a document.
   -OR-
   Type the document number directly into the Document Number* field.
4. Click View Document to open the document as a PDF.
   Note: You can use the Approvals & Related Documents option to view the approval information that includes approval history and approvals required. In addition to this, you can also view related documents and attachments.

View a document – option 2
Updated: August 27, 2020
You can use these steps to view a document from the **Query Results** page in drill-down view.

**Procedure**

1. Drill down to the query that you want to view the transaction details for. For example: **My Finance Query > Multi Year** query.

2. On the **Query Results** page, drill down further by clicking on a budget figure against the query. For example: **$40,000.00**
   
   Result: This will open the budget transaction details for that query.

3. Click **Document Code** to open the details as a PDF.

   Note: You can click **View Parameters** to view the approval information, related documents, and attachments.

**Use Extensibility in My Finance Query**

*Updated: August 27, 2020*

You can hide optional page elements or change elements field labels using the Extensibility tool set delivered with the application.

**About this task**

Use the **Extension Editor**, accessed in **My Finance Query Tools** menu, to configure which elements you want to modify. When the extensions are edited and saved, this configuration is applied uniformly across your site's My Finance Query implementation.

Only users who have a Web Tailor admin role can use the extension editor. For more information about this role, refer to the Finance Web app extensibility section in the **Banner Finance Self-Service Install** documentation.

Note: The my_finance_query.json file is included with the release documentation on the Ellucian Documentation site. To download the file, navigate to the **Banner Finance Self-Service Configure** documentation, **Use Extensibility in My Finance Query** topic, click More, then Attachment, and select the file to download.

**Procedure**

1. Log in to My Finance Query using the Web Tailor Admin role.

2. Click **Tools** and select **Extensibility > Edit Extensions**.

   Result: The **Extension Editor** window appears.

3. For the element for which you want to change the label, modify the label in the corresponding JSON code in the **Extension Editor** window as shown in the following examples:
If you want to change the label from Organization to Department, the following JSON code portion in the Requisition Comments must be modified from
{"label":"Organization"} to {"label": "Department"}.

4. Use the exclude value to specify that an element is displayed or hidden.
   • "exclude":true hides the element
   • "exclude":false displays the element

5. Based on the needs of your institution, use the JSON files supplied for the Individual Query Types or the consolidated one which contains all possible extensible elements in My Finance Query.
   You can mix and match sections of the JSON code contained in the provided my_finance_query.json file.
   After the JSON returns modifications, make sure they are valid by verifying against any of the available JSON validators.
   For example:
   • http://jsonlint.com/
   • https://jsonformatter.curiousconcept.com/

<table>
<thead>
<tr>
<th>Query Type</th>
<th>Use JSON Code File</th>
</tr>
</thead>
<tbody>
<tr>
<td>My Finance Query</td>
<td>my_finance_query.json</td>
</tr>
</tbody>
</table>

6. Click Submit to save the extension.
   Result: A notification center message appears verifying the extension was saved.

7. Refresh the page to verify your changes were made.

My Requisitions
Updated: August 27, 2020

My Requisitions allows you to create and submit a purchase requisition. You can create a purchase requisition using either document-level or commodity-level accounting.

You can also use this application for the following:

• Save requisition as a draft (Draft status)
• Edit a draft requisition and submit a draft requisition
• Delete a draft requisition
• View requisition status
• Copy a completed requisition
• Add comments (public and private)
• Add and delete attachments using Banner Document Management
• Recall your requisition from Banner Finance Self-Service approvals
• Search and filter requisitions you have created
• Order returned search data
• View a requisition as a PDF

My Requisitions status
Updated: August 27, 2020

A status indicates the state of a purchase requisition.

<table>
<thead>
<tr>
<th>Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Draft</td>
<td>Requisition previously saved as a draft and awaiting final submission. You can edit and submit.</td>
</tr>
<tr>
<td>Pending</td>
<td>Requisition is pending approval in one of the Banner Finance Self-Service approval queues.</td>
</tr>
<tr>
<td>Disapproved</td>
<td>Requisition submitted but disapproved by a Banner Finance Self-Service approver. The approver can provide Disapproval Text explaining why the requisition was disapproved. You can edit disapproved requisitions and resubmit them.</td>
</tr>
</tbody>
</table>
| Completed   | • Completed = Requisition approved and posted.  
              • Converted to PO = Requisition items have been converted to Purchase Orders.  
              • Assigned to Buyer = Requisition assigned a buyer code, making the buyer responsible for it. |

My Requisitions pages
Updated: August 27, 2020

This section describes the My Requisitions pages and the tasks you can perform using these pages.

My Requisitions page
Updated: August 27, 2020

The My Requisitions page serves as the home page. Use this page to create requisitions and view requisitions you have created.

My Requisitions is separated into three sections:

• Draft Requisitions
• Pending Requisitions
• Completed Requisitions
Requisitions appear in each section if available. The number of requisitions in each section is listed after the section's title. By default, only two requisitions are listed when a section contains more than two. To view more requisitions, click View More.

Clicking the information icon next to a requisition's status provides a summary window of information for the requisition. This window can also contain comments. For example, if a requisition is disapproved, the user who disapproved it can add a comment explaining why the requisition is disapproved.

You can click anywhere on the selected document row to view the requisition's detailed information.

Requester Information page
Updated: August 27, 2020

The Requester Information page allows you to specify who is creating the requisition.

For user convenience, field information on this page is already completed and defaults from the requester's Banner Finance Self-Service User Profile (FOMPROF).

You can accept the default values provided or select alternate values if needed. You can provide an explanation or justification for the requisition by adding comments or an attachment.

Also, you have the option to select the requisition's accounting type (Document or Commodity), if that option for user choice has been configured when the application was deployed.

Vendor Information page
Updated: August 27, 2020

In the Vendor Information page, you define the vendor for the purchase requisition.

Selecting a vendor is optional. You can select the Choose vendor for me check box to let your Procurement Office select the vendor. The administrator has the ability to default the Choose Vendor for Me check box as selected or cleared.

The page also contains fields defining the default discount terms and the vendor's base currency.

Add Item & Accounting page
Updated: August 27, 2020

This page allows you to add items and accounting distributions to the requisition.

Page fields enable you to provide and select the data for the accounting distributions (budget line items) to which the request cost will be charged. The application supports document or commodity level accounting. You can also update or delete the accounting distribution.

Commodity information
Updated: August 27, 2020
This page contains the requisition's descriptive information about the goods and services requested.

Page fields include information about the unit of measure, quantity, unit price, and any additional costs, such as shipping and handling. You can add comments for each commodity item, or update or delete the commodity item. You can select a commodity code/description from the lookup or enter commodity information not available in the lookup. You can also update the Tax and Discount fields.

Attachments page
Updated: August 27, 2020

This page contains a list of the requisition's attachments.

You can add, delete, and view attachments. When viewing any attachment, you can see the document stored in the B-F-DOCS application in Banner Document Management.

My Requisitions tasks
Updated: August 27, 2020

This section contains the tasks you can perform using My Requisitions.

Create a requisition
Updated: August 27, 2020

To begin the purchase process, use the My Requisitions dashboard page to create a purchase requisition.

Procedure

1. On the My Requisitions dashboard page, click Create Requisition.
2. On the Requestor Information page, specify who is requesting the purchase using the available fields if you are not the default requester for the account.
3. Click Next to continue to the next page.
4. On the Vendor Information page, select the vendor for the requisition.
   By default, the Choose vendor for me check box is selected. When selected, the system chooses a vendor for you. Clear the check box if you want to select the vendor.
5. On the Add Item & Accounting page, add an item using the Add Item(s) field.
   Result: After an item is selected, the page updates with required fields for the selected item.
6. Click Save.
   Result: The page refreshes with the item you just added listed below the Add Item(s) field in the Commodities list. You can click any item in the list to view its details.
7. Repeat steps 4 and 5 as necessary to add additional items to the requisition.
8. Click Add Accounting.
   Result: The page refreshes with the required fields for accounting information.
9. Click **Save**.
    Result: The Requisition Summary updates.

10. Click **Save as draft** if you want to return to the requisition before submitting or **Submit Requisition** to send the requisition for approval.

**Copy a requisition**

*Updated: August 27, 2020*

You can copy a completed requisition and use it as a template for a new requisition.

**Procedure**

1. On the **My Requisitions** dashboard page, click the completed requisition you want to copy.
   Result: The requisition opens on the **Requestor Information** page.

2. Click **Copy Requisition**.

3. On the copy prompt, choose the appropriate option.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>The system copies the requisition and creates an identical new requisition that you can edit.</td>
</tr>
<tr>
<td>No</td>
<td>The system cancels the copy.</td>
</tr>
</tbody>
</table>

4. Edit the requisition as appropriate, just as you would a new requisition.

**Delete a requisition**

*Updated: August 27, 2020*

You can delete any requisition that is in Draft status.

**Procedure**

1. On the **My Requisitions** dashboard page, click the requisition in Draft status you want to delete.
   Result: The requisition opens on the **Requestor Information** page.

2. Click **Delete Requisition**.

3. On the delete prompt, choose the appropriate option.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>The system deletes the requisition.</td>
</tr>
<tr>
<td>No</td>
<td>The system cancels the delete.</td>
</tr>
</tbody>
</table>

**Edit a requisition**

*Updated: August 27, 2020*

You can edit requisitions in Draft status. To edit a requisition in Pending status, you must recall the requisition.
Procedure

1. On the My Requisitions dashboard page, click Draft in the Status column for the requisition that you want to edit.
2. Using the Next and Back buttons, edit the Requestor Information, Vendor Information, and Add Item & Accounting pages as necessary.
3. Click Save as draft if you want to return to the requisition before submitting or Submit Requisition to send the requisition for approval.

Add an attachment to a requisition
Updated: August 27, 2020

After an attachment is created, such as a statement of work, you can add an attachment to the requisition at any time before submitting the requisition. You can add attachments to requisitions in Draft or Disapproved status.

Procedure

1. Open the requisition in Draft or Disapproved status to which you want to add an attachment.
2. Click Attachments.
3. Click Attach File.
4. Using the Attach Documents prompt, choose a file to attach.
5. Select the Document Type.
6. Click Upload.
   Result: The file is added to the Attachments page list.

Delete an attachment from a requisition
Updated: August 27, 2020

If you want to delete an attachment from a purchase requisition, you can use the Attachments page to delete one or more attachments.

Procedure

1. Open the requisition containing the attachment you want to delete.
2. Click Attachments.
3. On the Attachments page, click the attachment that you want to delete in the Attachments list, and then click Delete.
4. Confirm that you want to delete the attachment.

Recall a requisition
Updated: August 27, 2020

You can recall requisitions that are in Pending status.
Procedure

1. On the My Requisitions dashboard page, open the pending requisition that you want to recall.
2. Click Recall My Requisition.
3. On the recall prompt, choose the appropriate option.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>The system recalls the requisition. The My Requisitions dashboard page loads with the recalled requisition placed in the draft requisitions section with a draft status.</td>
</tr>
<tr>
<td>No</td>
<td>The system cancels the recall.</td>
</tr>
</tbody>
</table>

View as PDF
Updated: August 27, 2020

You can download the purchase requisition as a PDF file to verify requisition information is correct.

Procedure

1. Open the requisition that you want to view as a PDF.
2. Click View as PDF.
   Result: My Requisitions formats the requisition's information into PDF format.
3. Right-click in the PDF file for other options, such as printing or saving the requisition.

Use Extensibility in My Requisitions
Updated: August 27, 2020

You can hide optional page elements or change elements field labels using the Extensibility tool set delivered with the application.

About this task

Use the Extension Editor, accessed in My Requisitions Tools menu, to configure which elements you want to modify. When the extensions are edited and saved, this configuration is applied uniformly across your site's My Requisitions implementation.

Only users who have a Web Tailor admin role can use the extension editor. For more information about this role, refer to the Finance Web app extensibility section in the Banner Finance Self-Service Install documentation.

Note: The my_requisitions.json file is included with the release documentation on the Ellucian Documentation site. To download the file, navigate to the Banner Finance Self-Service Configure documentation, Use Extensibility in My Requisitions topic, click More then Attachment, and select the file to download.
Procedure

1. Log in to My Requisitions using the Web Tailor Admin role.

2. Click Tools and select Extensibility > Edit Extensions.
   
   Result: The Extension Editor window appears.

3. For the element for which you want to change the label, modify the label in the corresponding JSON code in the Extension Editor window as shown in the following examples:
   
   If you want to change the label from Public Comment to Printable Comment, the following JSON code must be modified as follows:
   
   ```json
   {"label":"Public Comment"}
   to
   {"label": "Printable Comment"}
   ```

4. Use the exclude value to specify that an element is displayed or hidden.
   
   - "exclude":true hides the element
   - "exclude":false displays the element

5. Based on the needs of your institution, use the JSON files supplied for the all possible extensible elements in My Requisitions.
   
   You can mix and match sections of the JSON code contained in the provided my_requisitions.json file.
   
   After the JSON returns modifications, make sure they are valid by verifying against any of the available JSON validators.
   
   For example:
   
   - http://jsonlint.com/
   - https://jsonformatter.curiousconcept.com/

<table>
<thead>
<tr>
<th>Query Type</th>
<th>Use JSON Code File</th>
</tr>
</thead>
<tbody>
<tr>
<td>My Requisitions</td>
<td>my_requisitions.json</td>
</tr>
</tbody>
</table>

6. Click Submit to save the extension.
   
   Result: A notification center message appears verifying the extension was saved.

7. Refresh the page to verify your changes were made.

My Journals

Updated: August 27, 2020

My Journals allows you to create and edit multiple journal entries into the Finance Self-Service ledgers. The logged-in users can view only their own journals document.

You can use My Journals to perform the following:

- Copy a journal
- Reverse a journal
• Delete a journal
• Edit a journal
• Recall a journal
• Add and delete journal attachments
• Download a journal as a PDF
• Export a journal into Excel

My Journals status
Updated: August 27, 2020

A status indicates the journal's state.

<table>
<thead>
<tr>
<th>Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Draft</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Draft = Journal saved as a draft and awaiting final submission.</td>
</tr>
<tr>
<td></td>
<td>• Disapproved = Journal disapproved by the approver.</td>
</tr>
<tr>
<td></td>
<td>• Automatic = Base automatic general voucher.</td>
</tr>
</tbody>
</table>

You can edit and submit the journal in any of these statuses.

Pending

• In Approval = Journal is pending approval in one of the Banner Finance Self-Service approval queues.
• Deferred = Journal whose transaction edit processing is deferred to the Transaction Interface Process.

Completed

Completed = Journal approved and posted.

My Journals pages
Updated: August 27, 2020

Access the My Journals home page to review the sections and perform associated tasks.

My Journals page
Updated: August 27, 2020

Use the My Journals page to create journals and view existing journals.

My Journals has three sections:
• Draft Journals
• Pending Journals
Completed Journals

Journals appear in each section if available. The number of journals in each section is listed after the section's title. By default, only two journals are listed when a section contains more than two. To view more journals, click View More.

Clicking the information icon next to a journal's status provides a journal summary window which can also contain comments. For example, when a user disapproves a journal they can add a comment explaining why they disapproved.

Click anywhere on the selected document row to view the journal's detailed information. Click the More Actions icon to perform additional actions like copy, reverse, delete, and recall.

View More page
Updated: August 27, 2020

Clicking View More on the dashboard allows you to view more journals of each section.

Use the filter icon to filter the document by statuses. Click the More Actions icon to perform additional actions like copy, reverse, delete, and recall.

Click anywhere in the selected document row to view the journal's detailed information.

Header information page
Updated: August 27, 2020

Use the Header information page to create a journal's header information, and also edit and view the details.

For convenience, you can use the page to fill accounting defaults which defaults while creating accounting sequences in the same user session.

Accounting information page
Updated: August 27, 2020

Use the Accounting information page to create a journal's accounting information, and also edit and view the details.

For convenience, the accounting defaults that you enter on the header page will default for each accounting sequence. You can accept the default values, or select alternate values if needed.

After creating an accounting sequence, you can create another sequence by clicking Add Accounting without closing the overlay window. After saving an accounting sequence, My Journals validates the document and the resulting status displays as Postable, Error, or NSF error. This enables you to edit the information and make any necessary changes.

Summary page
Updated: August 27, 2020
The Summary page contains detailed information of the selected journals document.

In the Summary page, you can view and edit header and accounting information, view the journal details as a PDF, and download the details into an Excel spreadsheet.

Click the More Actions icon to copy, reverse, delete, and recall the journal. Click the Show/Hide icon to show and hide any columns on the accounting distribution grid.

Click Save as draft to keep the document in the draft status. Click Submit to complete the document.

Attachments page
Updated: August 27, 2020

This page contains a list of the journal's attachments.

You can add, delete, and view attachments. When viewing any attachment, you can see the document stored in the B-F-DOCS application in Banner Document Management.

My Journals tasks
Updated: August 27, 2020

This section contains the tasks you can perform using My Journals.

Create a journal
Updated: August 27, 2020

To begin the journal process, use the My Journals dashboard page to create a journal.

Procedure

2. On the Create Journal overlay window, specify Header information using the available fields.
3. Enter information in the Accounting Defaults section, if required to be defaulted in the Accounting Distribution page.
4. Enter information in the Public Comment and the Private Comment fields, if required.
5. Click CREATE.
   Result: The Journal document is created with the header information and the Summary page displays with the Add Accounting overlay window.
6. On the Add Accounting overlay window, specify journal details using the available fields.
7. Click SAVE.
   Result: The page refreshes with the accounting item you just added listed in the Accounting Distribution grid.
8. To add additional accounting items, click Add accounting.
Result: The Add Accounting overlay window displays. Repeat steps 6 and 7 to add more accounting items.

9. Click Back if you want to return to the My Journals dashboard.
   • Or, click Save as draft to mark the document as draft and return to the dashboard.
   • Or, click Submit Journal to send the journal for approval.

Edit a journal
Updated: August 27, 2020

You can edit any journal that is in Draft, Disapproved, and Automatic status.

Procedure

1. On the My Journals dashboard page, click on any row under the Draft Journals section for the journal that you want to edit.
2. On the Summary page, click the Edit Header icon.
   Result: The journal header overlay window displays.
3. Edit the header information, accounting defaults, and journal comments.
4. Click UPDATE.
5. On the Summary page, under the Accounting Distribution grid, click any accounting item to edit.
   Result: Accounting Distribution overlay window displays.
7. Click SAVE or ADD ACCOUNTING.
   Result:
   • If you click SAVE, the accounting item saves and closes.
   • If you click ADD ACCOUNTING, the existing record saves, and displays a new accounting distribution overlay window to add a new accounting item.

Copy a journal
Updated: August 27, 2020

You can copy an existing journal and use it as a template for a new journal.

Procedure

1. On the My Journals dashboard page, click the ellipsis, then click Copy Journal.
   You can also perform this action on the View More page and the Summary page.
2. On the copy prompt, choose the appropriate option.
   Note: Select the Copy Comments check box if you want to copy the journal document comments.
Reverse a journal
Updated: August 27, 2020

You can reverse any journal.

**Procedure**

1. On the **My Journals** dashboard page, click the ellipsis, then click **Reverse Journal**. You can also perform this action on the **View More** page and the **Summary** page.
2. On the copy prompt, choose the appropriate option.
   
   Note: Select the **Copy Comments** check box if you want to copy the journal document comments.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>OK</td>
<td>The system reverses the journal.</td>
</tr>
<tr>
<td>Cancel</td>
<td>The system cancels the reverse action.</td>
</tr>
</tbody>
</table>

Delete a journal
Updated: August 27, 2020

You can delete any journal that is in Draft, Disapproved, and Automatic status.

**Procedure**

1. On the **My Journals** dashboard page, click the ellipsis, then click **Delete Journal**. You can also perform this action on the **View More** page and the **Summary** page.
2. On the delete prompt, choose the appropriate option.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>The system deletes the journal.</td>
</tr>
<tr>
<td>No</td>
<td>The system cancels the delete action.</td>
</tr>
</tbody>
</table>

Recall a journal
Updated: August 27, 2020

You can recall journals that are in the In Approval status.
Procedure

1. On the My Journals dashboard page, click the ellipsis, then click Recall Journal. You can also perform this action on the View More page and the Summary page.

2. On the reverse prompt, choose the appropriate option.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>YES</td>
<td>The system recalls the journal. The My Journals dashboard page loads with the recalled journal placed in the draft Journals section with a draft status.</td>
</tr>
<tr>
<td>NO</td>
<td>The system cancels the recall action.</td>
</tr>
</tbody>
</table>

Copy and delete accounting line item
Updated: August 27, 2020

You can copy and delete accounting line item for journals that are in Draft, Disapproved, and Automatic status.

Procedure

1. Click the journal on the My Journals dashboard page. The Summary page displays. You can also perform this action on the View More page.

2. Select the check box corresponding to the accounting item to copy or delete it.

3. Click the Copy or the Delete icon.

   Result:
   - On clicking Copy, the accounting line item get copied over to a new accounting item, and presented in the Edit mode.
   - On clicking Delete, the delete sequence prompt displays.

4. On the delete prompt, choose the appropriate option.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>The system deletes the accounting item(s).</td>
</tr>
<tr>
<td>No</td>
<td>The system cancels the delete action.</td>
</tr>
</tbody>
</table>

Show and Hide columns in Accounting Distribution grid
Updated: August 27, 2020

You can hide or show accounting distribution information columns.

Procedure

1. Click the journal on the My Journals dashboard page. The Summary page displays. You can also perform this action on the View More page.
2. Click the **Show/Hide** icon.
   Result: The list displays all the columns with a corresponding check box.
   
   You can select the **All** check box to hide or show all the columns.

Add an attachment to a journal
Updated: August 27, 2020

After an attachment is created, you can add an attachment to the journal at any time before submitting the journal. You can add attachments to journals in Draft, Disapproved, or Automatic status.

**Procedure**

1. Open the journal in Draft or Disapproved or Automatic status to which you want to add an attachment.
2. Click the **Attachments** icon.
3. Click **Attach File**.
4. Using the **Attach Documents** prompt, choose a file to attach.
5. Select the **Document Type**.
6. Click **Upload**.
   Result: The file is added to the Attachments page list.

Delete an attachment from a journal
Updated: August 27, 2020

If you want to delete an attachment from a journal in Draft, Disapproved, and Automatic status, you can use the **Attachments** page to delete one or more attachments.

**Procedure**

1. Open the journal containing the attachment you want to delete.
2. Click **Attachments**.
3. On the **Attachments** page, click the attachment that you want to delete in the Attachments list, and then click **Delete**.
4. Confirm that you want to delete the attachment.

View as PDF
Updated: August 27, 2020

You can download the journal as a PDF file to verify that the journal information is correct.

**Procedure**

1. Open the journal that you want to view as a PDF.
2. Click the **Download** icon, then click **View PDF** to view the journal as a PDF file in a new tab.

**Download as Excel spreadsheet**

*Updated: August 27, 2020*

You can download a journal as an Excel spreadsheet to your local drive.

**Procedure**

1. Open the journal that you want to download.
2. Click the **Download** icon, then click **Export to excel** to download the journal as an Excel spreadsheet to the default download location on your local drive.

**Use Extensibility in My Journals**

*Updated: August 27, 2020*

You can hide optional page elements or change elements field labels using the Extensibility tool set delivered with the application.

**About this task**

Use the **Extension Editor**, accessed in **My Journals Tools** menu, to configure which elements you want to modify. When the extensions are edited and saved, this configuration is applied uniformly across your site’s My Journals implementation.

Only users who have a Web Tailor admin role can use the extension editor. For more information about this role, refer to the Finance Web app extensibility section in the *Banner Finance Self-Service Install* documentation.

Note: The `my_journals.json` file is included with the release documentation on the Ellucian Documentation site. To download the file, navigate to the *Banner Finance Self-Service Configure* documentation, **Use Extensibility in My Journals** topic, click **More** then **Attachment**, and select the file to download.

**Procedure**

1. Log in to My Journals using the Web Tailor Admin role.
2. Click **Tools** and select **Extensibility > Edit Extensions**.
   
   Result: The **Extension Editor** window appears.
3. For the element for which you want to change the label, modify the label in the corresponding JSON code in the **Extension Editor** window as shown in the following examples:
   
   If you want to change the label from **Public Comment** to **Printable Comment**, the following JSON code must be modified as follows:
   
   ```json
   {"label":"Public Comment"}
   ```
   to
4. Use the `exclude` value to specify that an element is displayed or hidden.
   - "exclude":true hides the element
   - "exclude":false displays the element

5. Based on the needs of your institution, use the JSON files supplied for all possible extensible elements in My Journals.
   You can mix and match sections of the JSON code contained in the provided `my_journals.json` file.
   After the JSON returns modifications, make sure they are valid by verifying against any of the available JSON validators.
   For example:
   - http://jsonlint.com/
   - https://jsonformatter.curiousconcept.com/

<table>
<thead>
<tr>
<th>Query Type</th>
<th>Use JSON Code File</th>
</tr>
</thead>
<tbody>
<tr>
<td>My Journals</td>
<td>my_journals.json</td>
</tr>
</tbody>
</table>

6. Click **Submit** to save the extension.
   Result: A notification center message appears verifying the extension was saved.

7. Refresh the page to verify your changes were made.

**Purchase Orders**

*Updated: August 27, 2020*

The Purchase Order page allows you to create purchase orders or continue with purchase orders you or another user have left in process.

**Conditions required for a self-service Purchase Order to be processed**

- The accounting method must be document level accounting.
- Available budget must be present when Error level budget checking applies. There is no NSF Override capability.
- A Purchase Order must have 1 to 5 commodity items.
- A Purchase Order must have 1 to 5 accounting sequences.

Note: Ensure that the purchase orders meet the Self-Service criteria of no Standing Orders, no Blanket Orders, no Purchase Orders from Requisitions, and no EDI documents.

**Self-Service Purchase Orders**

*Updated: August 27, 2020*

Note the following points about Self-Service Purchase Orders.
• You cannot mix GL and OPAL accounts no matter what type of commodities.
• You can always mix fixed asset commodities and non-fixed asset commodities.
• There are situations in which one sequence has an expense account with an associated fixed asset account, and the next sequence has an expense account without a fixed asset account. In this situation, the purchase order (when completed) will display a message stating that the mix and match of these accounts gives you an incomplete fixed asset record.
• You can mix stores and non-stores commodities as long as you use OPAL accounts.
• If you use stores commodities, you can have only one GL accounting sequence.

Purchase Order pages
Updated: August 27, 2020

All purchase orders on the Self-Service application are of the type Regular and require a commodity unit price. You cannot send purchase orders created on the Self-Service application using Electronic Data Interchange (EDI).

Default values
Updated: August 27, 2020

The system replaces the default value, (if available) into the field under the following circumstances.

• When a pull-down list has a value of Select
• When an entry box is null
• When you click Validate

If you enter a value into the field before you select Validate, the system does not overwrite the value you entered. When appropriate, a message displays to let you know you have entered a value that differs from the system default.

Fields affected by this functionality include the following:

• Currency Code
• Address Type
• Address Sequence
• Vendor Contact
• Discount Code
• Attention To
• Commodity Description
• Unit of Measure
• Tax Group
Purchase Order tasks
Updated: August 27, 2020

Create a new purchase order, retrieve an existing template, or search for an existing purchase order in process. See the succeeding sections for more instructions on how to accomplish these tasks.

After reviewing the required fields, you can either choose Complete to perform a validation and forward the document for processing, or choose Save In Process to validate and save the current contents without completion.

Create, validate, and save a PO as In Process
Updated: August 27, 2020

To begin creating a Purchase Order, access the My Finance main menu.

Procedure

1. Click Purchase Orders.
2. Optional: Click the Use Template drop-down and choose a template from the list. If you choose to not use a template, you can simply begin entering values.
3. Optional: Click Retrieve. Result: This populates the relevant fields in the PO.

   Note: Some of the fields auto-populate with values that are sourced from the Banner admin application, while you will need to manually populate the others based on your institution's needs.

   If you choose to not retrieve a template, you can simply begin entering values.
4. Check the following field sections to verify the values and modify as necessary.

   a) Verify the fields in the Dates section.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Transaction Date</td>
<td>Banner posts the purchase order information to the ledger on the transaction date. For successful online processing, ensure that the date is in an open period, and budget exists.</td>
</tr>
<tr>
<td>Purchase Order Date</td>
<td>Date associated with the purchase order.</td>
</tr>
<tr>
<td>Delivery Date</td>
<td>Date that delivery is required. Enter a date that is equal to or greater than the transaction date.</td>
</tr>
<tr>
<td>Buyer Code</td>
<td>Code associated with the buyer to whom this purchase order will be assigned for processing.</td>
</tr>
</tbody>
</table>
After a user creates a first purchase order, the **Buyer Code** field is automatically populated with this buyer each time the user accesses the page, regardless of session.

**b) Verify the fields in the **Vendor Details** section.**

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vendor ID</td>
<td>Vendor from whom the merchandise will be purchased.</td>
</tr>
<tr>
<td>Vendor Hold</td>
<td>Displays a Hold Reason Code that identifies a reason to prevent the vendor from submitting a PO.</td>
</tr>
<tr>
<td>Address Type</td>
<td>Code that identifies the classification of address; for example, the BU (business address), BI (billing address), and HO (home address). The default Address Type on the Vendor Maintenance (FTMVEND) page automatically populates this field if it has been entered on FTMVEND.</td>
</tr>
<tr>
<td>Address Sequence</td>
<td>Sequence to be used for the address type for this vendor.</td>
</tr>
<tr>
<td></td>
<td>The default address type Sequence Number on the Vendor Maintenance (FTMVEND) page automatically populates this field (if entered on that page).</td>
</tr>
<tr>
<td>Vendor Contact</td>
<td>Vendor contact name. The value in this field defaults from the Vendor Maintenance (FTMVEND) page.</td>
</tr>
<tr>
<td></td>
<td>A warning message displays if you enter a name that differs from the default value.</td>
</tr>
<tr>
<td></td>
<td>If the Vendor Contact you entered does not match the <strong>Vendor Contact</strong> field on FTMVEND, the following message displays: Warning: Vendor Contact entered does not match Vendor default contact.</td>
</tr>
<tr>
<td>Vendor E-mail</td>
<td>Vendor’s e-mail address.</td>
</tr>
</tbody>
</table>

c) **Verify the fields in the **Requester Details** section.**

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Requester Name</td>
<td>Name of the individual requesting this purchase order.</td>
</tr>
</tbody>
</table>
Field | Description
--- | ---
The value in this field defaults from the User Profile Maintenance (FOMPROF) page.

Requester E-mail
The value in this field defaults from the User Profile Maintenance (FOMPROF) page.

Requester Phone
Requestor’s country code, area code, phone number, and extension.
The values in these fields default from the User Profile Maintenance (FOMPROF) page.

Requester Fax
Country code, area code, phone number, and extension for requestor’s FAX number.
The values in these fields default from the User Profile Maintenance (FOMPROF) page.

d) Verify the fields in the **Account and Organization Details** section.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chart of Accounts</td>
<td>The value in this field defaults from the User Profile Maintenance (FOMPROF) page.</td>
</tr>
<tr>
<td>Organization</td>
<td>The value in this field defaults from the User Profile Maintenance (FOMPROF) page.</td>
</tr>
</tbody>
</table>

Currency Code
Currency code associated with this purchase order.
The initial value in the pull-down list is *Select*; other choices are codes from the Currency Codes Validation (GTVCURR) page.

When you enter a vendor on this page and select **Validate**, **Commodity Validate**, or **Complete**, the system checks to see if the vendor has a currency code. If the vendor does not have a currency code, the value in this field is from the **Base Currency** field on GUAINST.

- If base currency code is used, the system writes NULL to the **Currency Code** fields in the database and does not calculate, or store, converted amounts.

- If any other currency is used, the system uses the transaction date of the document for the As Of Date and performs calculations to determine the conversion rate. A system-calculated Converted Amount appears on this page.
Field | Description
---|---
only when the value in the **Currency Code** field does not represent base currency.

Note: During validation, if a foreign currency is not in use, the word *Select* will be replaced with your base currency code for display purposes.

If the **Currency Code** you selected does not match the **Vendor Currency Code** field on FTMVEND, the following message is displayed:
Currency Code selected does not match Vendor default currency.

<table>
<thead>
<tr>
<th>Discount Code</th>
<th>Code associated with the discount that you plan to apply to the document.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>The initial value in the pull-down list is <em>Select</em>; other choices include <em>NODISC</em> and codes from the Discount Terms Validation (FTVDISC) page.</td>
</tr>
<tr>
<td></td>
<td>Select <em>NODISC</em> to override the vendor default value.</td>
</tr>
<tr>
<td></td>
<td>When you access this page and select <strong>Validate</strong>, <strong>Commodity Validate</strong>, or <strong>Complete</strong>, the system checks the value in this field.</td>
</tr>
<tr>
<td></td>
<td>• If the value in this field is <em>Select</em> or <em>NODISC</em>, an editable column labeled <strong>Discount Amount</strong> displays in the Commodity Section.</td>
</tr>
<tr>
<td></td>
<td>If you do not enter a value in the <strong>Discount Amount</strong> field, the system displays a value of <em>.00</em> in the <strong>Discount Amount</strong> column in the <strong>Calculated Commodity Amounts</strong> section for each row that contains commodity data.</td>
</tr>
<tr>
<td></td>
<td>• If you use a discount code (the default value comes from the Vendor Maintenance page, FTMVEND), the system uses the document transaction date for the As Of Date to calculate values to display in the <strong>Discount Amount</strong> column in the <strong>Calculated Commodity Amounts</strong> section.</td>
</tr>
<tr>
<td></td>
<td>If the <strong>Discount Code</strong> you selected does not match the discount code on FTMVEND, the following message is displayed:</td>
</tr>
<tr>
<td>Field</td>
<td>Description</td>
</tr>
<tr>
<td>-------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>Discount Code selected does not match Vendor default discount.</strong></td>
<td></td>
</tr>
</tbody>
</table>
| **Tax Group** | Valid tax group in effect. The display of this field depends on whether **Tax Processing On** is selected at the system level on the System Control Maintenance (FOASYSC) page:  
  • When **Tax Processing On** is selected on FOASYSC, the **Tax Group** field appears in the header section and the Purchase Order Commodities section of this page. The system validates that the code in this field is active, using the transaction date of the document for the As Of Date.  
  • When **Tax Processing On** is not selected on FOASYSC, the **Tax Group** field is not displayed on the Web page in the Header Section or the Commodity Section. The system writes **NULL** to the **Tax Group** field in the database.  
  Note: If the Ship Code is associated with a Tax Group, the value in this field defaults to that value. Otherwise, the initial value in this field comes from the **Default Tax Group Code** field on FOASYSC.  
  If **Tax Processing On** is selected on FOASYSC and the commodity Tax Group you selected does not match the Tax Group indicated on FTMCOMM for that commodity, the following message is displayed: Warning: Tax Group on item [#] does not match commodity default.  
  If the **Override Taxes** check box on FTMCOMM is not selected, you do not have the authority to override the default tax group, and the system displays the following message and resets this field to display the required tax group: Warning: Tax group [code] may not be overridden on item [#]. |
<p>| <strong>Ship Code</strong> | Pre-defined address to which each purchase order item will be delivered. The value in this field defaults from the User Profile Maintenance (FOMPROF) page, if populated.                                                                                           |</p>
<table>

</tr>
<tr>
<td></td>
<td>• If you do not enter a commodity code and click Validate, Commodity Validate, or Complete, the system defaults to the Tax Group you selected in the Header section.</td>
</tr>
<tr>
<td></td>
<td>The system performs calculations and displays the resulting Tax Amount in the Calculated Commodity Amounts Section using the Tax Group for each commodity.</td>
</tr>
<tr>
<td></td>
<td>If Tax Processing On is selected on FOASYSC and the commodity Tax Group you selected does not match the Tax Group indicated on FTMCOMM for that commodity, the following message is displayed: Warning: Tax Group on item [#] does not match commodity default.</td>
</tr>
<tr>
<td></td>
<td>If the Override Taxes check box on FTMCOMM is not selected, you do not have the authority to override the default tax group, and the system displays the following message and resets this field to display the required tax group: Warning: Tax group [code] may not be overridden on item [#].</td>
</tr>
<tr>
<td>Quantity</td>
<td>Actual number of units required per commodity code or commodity description.</td>
</tr>
<tr>
<td>Unit Price</td>
<td>Actual dollar amount per unit of commodity or commodity description.</td>
</tr>
<tr>
<td>Discount Amount</td>
<td>Dollar amount to subtract from the individual commodity. This field does not display if a Discount Code is selected in the Header section.</td>
</tr>
<tr>
<td>Additional Amount</td>
<td>Dollar amount to add to the individual commodity.</td>
</tr>
</tbody>
</table>
f) Verify the fields in the **Calculated Commodity Amounts** section.

Information in this table is calculated based on the entries you made in the **Purchase Order Commodities** section.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Extended Amount</td>
<td>System-generated amount (quantity times unit price).</td>
</tr>
<tr>
<td>Discount Amount</td>
<td>If you are using a Discount Code, this field displays a system-calculated value. Otherwise, this field contains the Discount Amount entered in the Commodity Section.</td>
</tr>
<tr>
<td>Additional Amount</td>
<td>If the Additional Amount was entered in the Commodity Section, this field displays that amount.</td>
</tr>
<tr>
<td>Tax Amount</td>
<td>System-calculated field based on the Tax Group identified and the Extended, Discount, and Additional Amounts. This field displays only when <strong>Tax Processing On</strong> is selected on FOASYSC.</td>
</tr>
<tr>
<td>Net Amount</td>
<td>System-calculated field (Quantity x Unit Price – Discount + Additional + Taxes = Net Amount). This is calculated at time of Validation or Completion (with or without errors).</td>
</tr>
<tr>
<td>Converted Amount</td>
<td>Converted net amount calculated for this commodity record. This amount displays only when the value in the <strong>Currency Code</strong> field does not represent base currency.</td>
</tr>
</tbody>
</table>

g) Verify the fields in the **Purchase Order Accounting** section.

You cannot directly specify the Discount, Additional, or Tax amounts for a FOAPAL sequence. These amounts are split among the FOAPAL elements based on the percentage of the Net Amount total that each row represents.

- If you are using dollars, the total of all Accounting amounts is validated against the Net Amount.
- If you are using percentages, the total of all Accounting amounts must equal 100.
<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Index</td>
<td>Predefined set of FOAPAL values created in Banner. Because the self-service application does not do online defaulting, you must click Validate or Complete to re-default the FOAPAL values associated with the Index. After this is done, you can change or add required values.</td>
</tr>
<tr>
<td>Fund</td>
<td>Code associated with the Fund from which the purchase of the commodities will be financed.</td>
</tr>
<tr>
<td>Organization</td>
<td>Code associated with the Organization or persons authorized to make the purchase of the commodities. This is a conditional field. Organization is required conditionally based on the Account code. If an OPAL Account is used, then Organization is required.</td>
</tr>
<tr>
<td>Account</td>
<td>Code associated with the Account to which the purchase of the commodity will be charged.</td>
</tr>
<tr>
<td>Program</td>
<td>Code associated with the Program for which the commodities have been purchased. This is a conditional field. Program is required conditionally based on the Account code. If an OPAL Account is used, then Program is required.</td>
</tr>
<tr>
<td>Activity</td>
<td>Code associated with the Activity for which the commodities have been purchased.</td>
</tr>
<tr>
<td>Location</td>
<td>Code associated with the Location for which the commodities have been purchased.</td>
</tr>
<tr>
<td>Accounting</td>
<td>Depending on the dollar/percent radio group chosen, the number entered here calculates the budget amount to be used for this FOAPAL (either by percent or Actual Dollar amount). If the dollar amount is used, it must be equal to the Net Amount.</td>

<td>If selected, the template is saved as a shared template and all users can retrieve and use the template. If not selected, the template is saved as a personal template and is only retrievable by the person who sent it.</td>
</tr>
</tbody>
</table>

5. Validate using any of the following options.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Validate</td>
<td>This is in the Vendor Details section. When clicked, the system confirms that the Vendor ID entered is valid, defaults the Address Type and Sequence Number from FTMVEND, and displays the vendor name and address.</td>
</tr>
<tr>
<td>Commodity Validate</td>
<td>When this is clicked, the system validates the data entered in the Header and Commodity sections and calculates the amounts.</td>
</tr>
<tr>
<td>Validate</td>
<td>Clicking this validates all data entered in Header, Commodity, and FOAPAL Distribution sections, and displays calculated amounts.</td>
</tr>
</tbody>
</table>

Note: Error messages will appear at the top of the page if required fields are missing, or if you have entered data or dates that are not valid. Review if any, and modify the affected fields as needed.

6. Click **Save in Process** if you want to save a draft of the PO.

Result: The system validates all entered fields, and if successful, saves all information on the page to allow you to resume work on the purchase order at a later time.

**Related concepts**

- **Complete a PO**

**Retrieve an In Process PO**

Updated: August 27, 2020

You can search for an In Process PO if you want to process an existing PO that is still in process and have been saved as a draft.

**Procedure**

1. Navigate to the Purchase Orders page from the My Finance main menu.
2. Click **Search In Process Purchase Orders**.

   Result: This opens the Document Lookup page with the Purchase Order Code Lookup function.

3. Populate the relevant fields and click **Execute Query**.
Note: To be able to execute the query, you must ensure that at least one of the fields is populated.

Result: This displays the Purchase Order Lookup Results page listing the details of available documents. Editable documents display the document number as a link.

4. Click View to view a document as a PDF in a new tab.

5. If a Purchase Order in progress is eligible for update, click the document number link. 
   Result: This returns you to the Purchase Order page with an In Process document that you can review and modify as needed.
   Note: Ensure that the document meets the Self-Service criteria of no more than five commodity items and accounting sequences, Document Level Accounting, no Standing Orders, no blanket order processing, no POs from Requisitions, and no EDI documents.

Complete a PO
Updated: August 27, 2020

After the system validates a new or In Process PO, click Complete to complete the PO document.

When you click Complete, the system validates all entered fields one last time before completion.

Note: This is the same as Validate; except that if all dates, fields, and data are valid, the system completes the document and forwards it to Approvals or Posting.

Create a new PO using details from a completed PO
Updated: August 27, 2020

After you complete a Purchase Order document, you can create another document.

You can click Another Purchase Order, Same Vendor to create a purchase order with the same Vendor and Accounting information as the completed PO. You will have to enter new commodity information.

Alternately, click Another Purchase Order, New Vendor to create a purchase order with new Vendor information. This retains the existing accounting information from the complete PO. You will have to enter new Commodity information.

Use Extensibility in Purchase Orders
Updated: August 27, 2020

You can hide optional page elements or change elements field labels using the Extensibility tool set delivered with the application.
About this task

Use the Extension Editor, accessed in Purchase Orders Tools menu, to configure which elements you want to modify. When you edit and save the extensions, the system applies the extensibility configuration uniformly across your site’s Purchase Orders implementation.

Only users who have a Web Tailor admin role can use the extension editor. For more information about this role, refer to the Finance Web app extensibility section in the Banner Finance Self-Service Install documentation.

Note: The purchase_orders.json file is included with the release documentation on the Ellucian Documentation site. To download the file, navigate to the Banner Finance Self-Service Configure documentation, Use Extensibility in Purchase Orders topic, click More, then Attachment, and select the file to download.

Procedure

1. Log in to Purchase Orders using the Web Tailor Admin role.
2. Click Tools and select Extensibility > Edit Extensions.

   Result: The Extension Editor window appears.
3. For the element for which you want to change the label, modify the label in the corresponding JSON code in the Extension Editor window as shown in the following examples:
   If you want to change the label from Public Comment to Printable Comment, the following JSON code must be modified as follows:
   
   ```json
   {"label":"Public Comment"}
   ```
   to
   
   ```json
   {"label": "Printable Comment"}
   ```
4. Use the exclude value to specify that an element is displayed or hidden.
   - "exclude":true hides the element
   - "exclude":false displays the element
5. Based on the needs of your institution, use the JSON files supplied for all possible extensible elements in Purchase Orders.
   You can mix and match sections of the JSON code contained in the provided purchase_orders.json file.
   After the JSON returns modifications, make sure they are valid by verifying against any of the available JSON validators.
   For example:
   - http://jsonlint.com/
   - https://jsonformatter.curiousconcept.com/

<table>
<thead>
<tr>
<th>Query Type</th>
<th>Use JSON Code File</th>
</tr>
</thead>
<tbody>
<tr>
<td>Purchase Orders</td>
<td>purchase_orders.json</td>
</tr>
</tbody>
</table>
6. Click **Submit** to save the extension.
   Result: A notification center message appears verifying the extension was saved.

7. Refresh the page to verify your changes were made.

**Approve Documents**

Updated: August 27, 2020

The Approve Documents page allows you to approve or disapprove a document of any type received by the Banner Finance approvals system.

Using this page, you can also recall a document of any type sent to the Banner Finance approvals system.

**Approve Documents pages**

Updated: August 27, 2020

Access the Approve Documents page to review a list of documents pending approval.

**Approve Documents parameter page**

Updated: August 27, 2020

On the Approve Documents parameters page, you can populate the **Document Number** field to view information about a specific document to be approved; use % or _ as a wildcard.

- Select the **User ID is next approver** option to view all the documents that are waiting for the specified user's approval before they can proceed to the next approval queue.
- Select the **All documents User may approve** option to view all the documents the specified user can approve even if they are not the next approver.

**Approve Documents List page**

Updated: August 27, 2020

The Approve Documents list provides the following information for each document pending approval.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

Approve Documents tasks
Updated: August 27, 2020

An authorized user can choose to approve or disapprove a document (requisition, purchase order, invoice, journal voucher, encumbrance, or direct cash receipt).

All users can recall unapproved documents they have created that were sent to the approvals system.

Approve a document
Updated: August 27, 2020

The **Approve** button enables an authorized user to approve the document.

About this task

The **Approve** button is only enabled if the person who logged in is authorized to approve the document.
Procedure

1. In the Approve Documents list, review the document detail and supporting information related to a document.

2. Click Approve.
   Result: The Approve Document window appears with the Approve and the Cancel buttons.

3. Optional: Enter a comment that explains the reason for approving the document.
   This goes through the Banner messaging system and the default approval comment can be edited or removed.

4. Click Approve to complete the approval process.

5. Click Cancel if you need to return from the Approve Document window without approving.

Approve a document in NSF status
Updated: August 27, 2020

After a document is complete and sent to the approval process, the document is distributed to the appropriate document queues during the first run of the approval process (FORAPPL).

While in the DOC queues, there is no way to override the NSF condition for individual accounting distributions through self-service. After all the required approvers have approved the document, the system sends a document in NSF status to the NSF queue.

When the document is in the NSF queue, it requires approval by a user with authority in the NSF queue and with NSF Override authority on the User Profile Maintenance (FOMPROF) page. The Approve function automatically sets the override for all NSF sequences in the document.

Disapprove a document
Updated: August 27, 2020

The Disapprove button enables a user to disapprove the document or recall the document to make changes before approval.

About this task

The Disapprove button is only enabled if the person who logged in is either authorized to disapprove the document or is the originator of the document.

Procedure

1. In the Approve Documents list, review the document detail and supporting information related to a document.

2. Click Disapprove.
   Result: The Disapprove Document window appears with the Disapprove and the Cancel buttons.

3. Required: Enter a comment that explains the reason for disapproving the document.
   This goes through the Banner messaging system and is a mandatory field.

4. Click Disapprove to complete the disapproval process.
5. Click **Cancel** if you need to return from the **Disapprove Document** window without disapproving.

   If you disapprove an eProcurement requisition or purchase order in self-service, the document is canceled in Banner with a cancellation reason code of EPCN and an update synchronization message is published along with the disapproved reason.

   If you disapprove a document that is not an eProcurement document, the document is marked incomplete and ready for correction or deletion.

**Use Extensibility in Approve Documents**

*Updated: August 27, 2020*

You can hide optional page elements or change elements field labels using the Extensibility tool set delivered with the application.

**About this task**

Use the **Extension Editor**, accessed in **Approve Documents Tools** menu, to configure which elements you want to modify. When you edit and save the extensions, the system applies the extensibility configuration uniformly across your site’s Approve Documents implementation.

Only users who have a Web Tailor admin role can use the extension editor. For more information about this role, refer to the Finance Web app extensibility section in the **Banner Finance Self-Service Install** documentation.

Note: The approve_documents.json file is included with the release documentation on the Ellucian Documentation site. To download the file, navigate to the **Banner Finance Self-Service Configure** documentation, **Use Extensibility in Approve Documents** topic, click **More [1]**, then **Attachment**, and select the file to download.

**Procedure**

1. Log in to Approve Documents using the Web Tailor Admin role.

2. Click **Tools [2]** and select **Extensibility > Edit Extensions**. Result: The **Extension Editor** window appears.

3. For the element for which you want to change the label, modify the label in the corresponding JSON code in the **Extension Editor** window as shown in the following examples:

   If you want to change the label from **Public Comment** to **Printable Comment**, the following JSON code must be modified as follows:

   ```json
   {"label": "Public Comment"}
   to
   {"label": "Printable Comment"}
   ```

4. **Use the exclude value to specify that an element is displayed or hidden.**

   - "exclude":true hides the element
5. Based on the needs of your institution, use the JSON files supplied for all possible extensible elements in Approve Documents. You can mix and match sections of the JSON code contained in the provided approve_documents.json file. After the JSON returns modifications, make sure they are valid by verifying against any of the available JSON validators. For example:
   - http://jsonlint.com/
   - https://jsonformatter.curiousconcept.com/

<table>
<thead>
<tr>
<th>Query Type</th>
<th>Use JSON Code File</th>
</tr>
</thead>
<tbody>
<tr>
<td>Approve Documents</td>
<td>approve_documents.json</td>
</tr>
</tbody>
</table>

6. Click **Submit** to save the extension. Result: A notification center message appears verifying the extension was saved.

7. Refresh the page to verify your changes were made.

**Budget Development**

Updated: August 27, 2020

The Budget Development pages allow you to prepare and finalize your operating budget during the annual budget cycle.

You can use Self-Service Budget Development for the following:

- Update budget worksheets which are budget lines within a Fund and Organization combination.
- Integrate Finance Budget Development activity with Salary Planner activity.
- Add budget line text notes related to the budget development cycle activity.
- Review history of the changes in proposed budget amounts during budget development.
- Query budgets at the detail worksheet level by using FOAPAL selection or selecting all budget lines in the Budget Phase.
- Query budgets by Organization hierarchy.
- Lock budget worksheets by Organization or by Organization hierarchy when budget development activity is complete.

**Enable Self Service Budget Development**

Updated: August 27, 2020

To enable Self Service Budget Development, access the System Control Maintenance (FOASYSC) page.
Procedure

1. Select the **Self Service Budget Development** check box.
   
   **Result:** This enables the Self-Service Budget Development pages and the Fund/Organization security for these pages.

   **Warning!** If the indicator is disabled, the system displays the error: **Budget Development on Self Service not enabled.**

   **Note:** There is no check box to turn off Self-Service Budget Development fund/org security. To effectively disable it, you can elect to give all users master access in the Self Service Budget section on the User Profile Maintenance (FOMPROF) page.

2. Optional: You can also select the **Self Service Budget Development History** check box.
   
   **Result:** This enables creation of audit history records that include deleted rows. For more information, see **Budget Development History.**

Establish User Access to Budget Development

**Updated: August 27, 2020**

Budget Development access is available based on the User Profile (FOMPROF) page in Banner Finance.

To access Budget Development, a user must be authorized by enabling the **Self Service Budget Access** indicator on the FOMPROF page.

For more information about establishing a user's Fund/Organization Security for Budget Development in Finance Self-Service, see **Establish Fund/Organization security** in the **Banner Finance Use** documentation.

Budget Development pages

**Updated: August 27, 2020**

You can access Budget Development from the main Finance menu.

From the Budget Development menu, the following options are available:

- My Worksheets
- Budget Development Query
- Budget Development Worksheets
- Maintain Organization Locks

My Worksheets

**Updated: August 27, 2020**
You can use the My Worksheets page to view your worksheets and access your information quickly without having to repeatedly enter values in the Budget Development Worksheet parameter pages selecting Budget Types and Account Types for display.

The list of worksheets for the selected Budget Phase represents your available options for worksheets that have budget lines present according to your User Profile and Fund/Organization authorization for Finance Self-Service Budget Development updates.

You can also choose Add Worksheet to revise your worksheet display parameters or to create a new worksheet combination of Fund, Organization, and Program not included in your My Worksheets list.

Budget Development Query
Updated: August 27, 2020

You can query Budget Development information in the Budget Line (FBBBLIN) table. If Self Service Budget Development History is enabled on the System Control Maintenance (FOASYSC) page, you can choose whether or not to continue displaying rows that have been deleted.

Note: A warning message displays on the budget query results page if the budget/phase combination you entered is closed.

Budget Development Query sections
Updated: August 27, 2020

The Budget Development Query report is divided into the following sections.

• Report Parameters – The parameters you entered display in this section. The displayed budget information is based on these parameters.

• Query Results – The level of Budget Development security you are assigned determines what information you are able to view. Information you are not authorized to query will not display.

  – For an Organizational Hierarchy query, the Query Results section displays lines for all successor organizations, but includes dollar amounts only for levels you are authorized to query.
    You can drill down to line item detail by selecting underscored items, or select one of the download options and download data to a spreadsheet.

  – For a Line Item Detail query, the Query Results section displays information only for organizations you are authorized to query.

• Action buttons:

  – All Ledger Columns allows you to download all the budget line columns to a spreadsheet including the columns not currently selected for display.

  – Selected Ledger Columns allows you to download the displayed columns to a spreadsheet.

Enter a name for your query and save it in the Save Query as field, or select Another Query to return to the first parameter page of the query. If you want another user to access this query, select Shared.
Budget Worksheet  
Updated: August 27, 2020

Use the Budget Worksheet as a tool to create what if scenarios and determine the impact changes have on your institution's budget before you incorporate these changes into your budget.

For example, you can make changes to line items and run different calculations by amount or percent. You can continue and accumulate these calculations. You can then post, or discard, the results.

If Self Service Budget Development History is enabled on System Control Maintenance (FOASYSC) page, you can include rows on the Self-Service display that have been deleted.

Note: Do not select the browser's Refresh or Back arrow when you are navigating in a worksheet. This can affect the results of any calculations not yet posted to the budget lines in the worksheet.

Worksheet parameters  
Updated: August 27, 2020

This section summarizes the parameters you entered, including the level 2 fund type. The worksheet displays the current proposed budget based on these parameters. Information is sorted by Program, Level 2 Account Type, Account, and Duration.

The following situations result in warning messages:

• If any other user has accessed this budget in the past four hours, you receive a warning message.
  To address access for concurrent users, you may want to customize the value of the within_hours variable in the BWFKBWSH package. This variable is set to 4 initially.

• If this is a new budget, you receive a warning message that this combination of FOAPAL elements does not currently exist.

• If the organization is locked, and you have posting access to a predecessor organization that is unlocked, you receive a warning message that the organization you are looking at is locked, but you will still be able to make changes.

• If the organization is locked, and you do not have posting access to a predecessor organization that is unlocked, you receive an error message that everything is locked and will not be able to make changes.

Mass Change Parameters (and Line Item changes)  
Updated: August 27, 2020

You can calculate mass changes to Budget Development data in this section. Changes to specific lines are made within the actual worksheet.

You cannot edit some information, such as original FOAPAL, Original Budget, Permanent Transfers/Revisions and Base Budget detail columns.
Mass changes
Updated: August 27, 2020

Mass changes apply to all rows in the worksheet that do not have line-specific changes.

Procedure

1. To round all of the entries in an existing budget:
   a) Enter a zero as the amount.
   b) Check the percent box.
   c) Click Calculate.
2. To make changes to all items on the worksheet:
   a) Enter information in the Mass Change Parameters section.
   b) Select Post to save mass changes.
3. If you enter an amount in the Change Value field:
   a) Leave the Percent check box blank.
   b) Choose Calculate.
      Result: The system adds (or subtracts) this dollar amount to the New Budget.
   c) Enter either a positive or a negative amount.
4. If you enter a value in the Change Value field:
   a) Select the Percent check box.
      Result: The system multiplies this percent by the New Budget amount and increases, or decreases, the New Budget amount accordingly.
   b) You can enter either a positive or a negative amount.
      Result: The result is rounded based on the selections you made in the Round To Nearest section.

Line item changes
Updated: August 27, 2020

Line item changes override mass changes during calculation. To make changes to specific line items on the worksheet, navigate to the Change Value column for the item. Line item changes are not saved until you select Post.

Procedure

1. If you enter an amount in the Change Value column:
a) Leave the Percent check box blank.

b) Choose Calculate.
   Result: The system adds (or subtracts) this dollar amount to the New Budget.

2. If you enter a value in the Change Value column:
   a) Select the Percent check box.
   Result: The system multiplies this percent by the New Budget amount and increases, or decreases, the New Budget amount accordingly. The result is rounded based on the selections you made in the Round To Nearest section.

Use the Worksheet section
Updated: August 27, 2020

You can populate the fields in the Worksheet section using the following points.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Status</td>
<td>Indicates if this budget line was built from the Operating Ledger (OPAL), Position Control (POSN), Salary Planner (SALP), or added (NEW), and marks deleted rows (DEL). Note: If the SALP status is displayed, you will not be able to update that line item outside of Salary Planner in Self-Service Budget Development.</td>
</tr>
<tr>
<td>Text</td>
<td>Indicates if text exists. To view or enter text, select the hypertext link in the account code field.</td>
</tr>
<tr>
<td>Program</td>
<td>Program code.</td>
</tr>
<tr>
<td>Account Type/Code</td>
<td>Account Type (left-justified) and Account Code (right-justified)</td>
</tr>
<tr>
<td>Title</td>
<td>Account Type or Account Code description.</td>
</tr>
<tr>
<td>Base Budget</td>
<td>Amount captured as the proposed budget when the Budget Build process (FBRBDBBB) was run including base budget amounts from a prior Operating Ledger budget.</td>
</tr>
<tr>
<td>Budget Duration Code</td>
<td>Type of budget: Permanent or Temporary.</td>
</tr>
<tr>
<td>Proposed Budget</td>
<td>Latest proposed budget posted to the Budget Line table (FBBBLIN).</td>
</tr>
<tr>
<td>Change Value</td>
<td>Amount by which you want to change this line item.</td>
</tr>
<tr>
<td>Percent</td>
<td>Associated with the Change Value field.</td>
</tr>
<tr>
<td></td>
<td>If selected, indicates that the line item should be changed by a specified percentage amount.</td>
</tr>
<tr>
<td>Cumulative Change</td>
<td>Difference between the Base Budget and the New Budget amounts.</td>
</tr>
<tr>
<td>Field</td>
<td>Description</td>
</tr>
<tr>
<td>---------------</td>
<td>-----------------------------------------------------------------------------</td>
</tr>
<tr>
<td>New Budget</td>
<td>Current proposed budget, including changes from this session that are not yet posted. The new budget is transferred to the proposed budget when the worksheet is created.</td>
</tr>
<tr>
<td>Delete Record</td>
<td>Check box that, when selected, changes the new budget amount for this line item to .00 and marks the item for deletion.</td>
</tr>
</tbody>
</table>

Use the New Row section
Updated: August 27, 2020

In the New Row section, you can enter new line items into the budget.

Procedure

1. Enter program, account code, duration, and proposed budget amount information for each item.
2. Use the link for Account/Program Code lookup to search for codes. You can only use Operating accounts and codes that match the parameters you used when creating the worksheet. If Self Service Budget Development History is enabled on the System Control Maintenance (FOASYSC) page and you add a row that was previously deleted, the amounts captured during the Budget Build, and any text, are retained.
3. Click Calculate to validate the information you entered.
4. Move the new rows into the worksheet.
5. Repeat action to add more than five rows.
6. Select Post to save new rows.
   Note: FOAPAL validation is based on the Activation Date of the Budget, or the system date if the activation date does not exist.

Worksheet actions
Updated: August 27, 2020

You can perform actions using the following buttons on the worksheet.

<table>
<thead>
<tr>
<th>Action button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Requery</td>
<td>Requery information last posted to the Budget Line table and discard current calculations from this session.</td>
</tr>
<tr>
<td>Calculate</td>
<td>Calculate changes, additions, and deletions as many times as you choose. Calculate does not save the updates to the Proposed Budget and does not record history for each calculation.</td>
</tr>
<tr>
<td>Post</td>
<td>Post revised budget amounts to the Budget Line table (FBBBLIN) and, if Self Service Budget Development History is enabled on FOASYSC, post a record to the Budget History table (FBRAUDT).</td>
</tr>
<tr>
<td>Action button</td>
<td>Description</td>
</tr>
<tr>
<td>-------------------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Download All Worksheet Columns</td>
<td>Download all columns of the worksheet to a spreadsheet, including the columns not currently selected for display.</td>
</tr>
<tr>
<td>Download Selected Worksheet Columns</td>
<td>Download the specific columns you chose on the parameter page to a spreadsheet.</td>
</tr>
</tbody>
</table>

Maintain Organization Lock
Updated: August 27, 2020

Use the Maintain Organization lock option to prevent (lock) or permit (unlock) any changes to a Chart, Budget ID, Phase, and Organization combination so that no additional changes can be posted through the Budget Development Worksheet.

Lock and Unlock
Updated: August 27, 2020

Lock prevents changes; unlock permits changes.

The locking process has a cascading effect; when you lock or unlock a higher organization, the others, beneath it, are locked or unlocked too. You can selectively unlock organizations beneath a locked organization, if you have the appropriate access. If any organization above your highest access level is locked, you will not be able to change lock statuses.

Authority passes up the hierarchy. For example, assume that an organization is locked. If you have access to an unlocked organization above the locked organization, you will receive a warning message, but will still be able to make changes.

Budget Development History
Updated: August 27, 2020

You can review budget development changes if Self Service Budget Development History is enabled on the System Control Maintenance (FOASYSC) page.

This is a listing of all posted changes made to a budget line as budgets are revised through the Self-Service worksheet.

Budget Development History is available from the following pages:

1. Budget Development Query > Organization Hierarchy Account Detail
2. Budget Development Query > Account Detail
3. Budget Development Worksheet > Account Detail

Budget Development History sections
Updated: August 27, 2020

The budget development history contains the following sections.
• Report Parameters – Summary of parameters that you entered.

• Query Results – All changes made to the selected budget line item, in descending order by date and time. That is, the most recent changes appear first.

Salary Planner
Updated: August 27, 2020

Position budgets from Salary Planner in Employee Self-Service are automatically interfaced to Budget Development worksheets in Finance Self-Service to provide budget development users the ability to review their departmental budgets in their entirety, including labor amounts.

Control of the automatic updating of labor amounts is set up in Salary Planner. Scenarios within Salary Planner may be identified to update budget development and post to Pool Accounts, if desired. For more information, see the Employee Self-Service Use documentation.

Postings from Salary Planner will insert, update, or delete based on the following:

• If a record to be posted does not exist in FBBBLIN table, it would be treated as an INSERT with an Origin of SALP.
• If a record to be posted exists in FBBBLIN table, it will be overwritten and the Origin changed to SALP, even if the previous Origin was not SALP (that is, NEW, OPAL, POSN, Null).
• If a record is removed as part of the Add/Delete logic in Salary Planner processing, the FBBBLIN record will be set to zero.

Salary Planner process flow
Updated: August 27, 2020

Postings to Budget Development follow the Budget ID and Phase associated with the Salary Planner Extract. This is set up on the Salary Planner Extract Rules (NTRSPEX) page in Banner.

Note: See that Budget ID and Phases are coordinated by the Budget Office to ensure that Salary Planner budgets are posted to the correct budget development records for combined overall budget views.

Master Salary Planner
Updated: August 27, 2020

The Budget Office, or Master Salary Planner, can set indicators when creating a scenario in Salary Planner. They can set it to update Budget Development and also to post to pool accounts, if desired.

If set to update, Proposed Position Budget Amounts gets posted to Budget Development (into the FBBBLIN table) when the Scenario is created in Salary Planner. If audit history is being captured, an entry to the history table (FBRAUDT) also occurs.

Budget Manager
Updated: August 27, 2020
A Budget Manager may make changes within Salary Planner. If the Scenario being changed is set to update Budget Development, any changed, new, or deleted position budget or labor distribution is automatically posted.

Deletions from Salary Planner will not result in a DEL record in the Finance Budget Development Worksheet, but a change/update to zero. The DEL status is reserved for deletions from the Finance Self-Service page. Make all Position Budget Amount changes in Salary Planner.

Finance Budget User
Updated: August 27, 2020

The Proposed Budget Amounts may be viewed on the Budget Development Query or Budget Worksheet pages.

Records posted from Salary Planner displays a Status (Origin) of SALP on the Budget Worksheet, and the User ID associated with these postings is SALPLAN. These records may not be modified within Self-Service Budget Development, therefore, make changes in Salary Planner.

Note: Salary Planner amounts may be zeroed out in Budget Development when running the Salary Planner Upload Process (NBPSPUP) if the position budgets amounts will be fed to Budget Development with FBRFEED, for example. This allows your institution the flexibility to decide whether it is appropriate to keep Salary Planner labor budgets (SALP origin) in Budget Development for future viewing.

Use pool accounts in Salary Planner
Updated: August 27, 2020

If you have selected the use of Pool Accounts in Salary Planner, the posting logic looks for a Pool Account value associated with the labor distribution account.

Procedure

1. Use the chart and budget fiscal year from the Salary Planner Extract.
2. Find the Begin and End Date from the Fiscal Year (NBAFISC) page for the chart and fiscal year.
3. If System Date is less than the budget fiscal year Begin Date, select the effective dated record that is equal to the budget fiscal year Begin Date. However, if no record is found, select the latest effective dated record that is less than the budget fiscal year Begin Date.
4. If System Date is equal to or greater than the budget fiscal year Begin Date, select the latest effective dated record that is less than or equal to the System Date.

Note: Do not make changes to Pool Accounts within the fiscal year and budget period. If you use automatic posting from Salary Planner, records are not cleared and reposted properly. Changes to Pool Accounts should be effective the first day of a new fiscal year.
Budget Development tasks

Updated: August 27, 2020

For performing tasks relating to Budget Development, access Budget Development from the Finance menu.

Create a Budget Development Query

Updated: August 27, 2020

Access Budget Development from the Finance main menu to create a Budget Development Query.

Procedure

1. On the Budget Development page, click **Budget Development Query**.
2. Choose one of the following:
   • To create a new Budget Query, click **Create Query**.
   or
   • To retrieve an existing template, choose a saved query and click **Retrieve Query**.
3. Select the columns you want displayed on the report.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Adopted Budget</td>
<td>Original adopted budget for the Base Budget.</td>
</tr>
<tr>
<td>Permanent Budget Adjustments</td>
<td>Permanent adjustments during the year for the Base Budget.</td>
</tr>
<tr>
<td>Temporary Adopted</td>
<td>Temporary adjustments to the adopted budget for the Base Budget.</td>
</tr>
<tr>
<td>Temporary Adjustments</td>
<td>Temporary adjustments to the budget during the year for the Base Budget.</td>
</tr>
<tr>
<td>Base Budget and Cumulative Change</td>
<td>Base Budget – Initial proposed budget from the Operating Ledger when the Budget Build process (FBRBDBB) was run. Cumulative Change – Difference between the Proposed Budget amount and the Base Budget amount.</td>
</tr>
<tr>
<td>Lock Status</td>
<td>Select this check box to display the current lock status. Current lock status displays only for an organization hierarchy query.</td>
</tr>
</tbody>
</table>

4. Select **Organization Hierarchy** to generate a display that begins with a summary by organization.
5. Select **Line Item Detail** to produce a listing of individual budget line rows that match your parameter criteria.
6. Enter your parameters as indicated in the following chart:
<table>
<thead>
<tr>
<th>Field/Option</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chart of Accounts</td>
<td></td>
</tr>
<tr>
<td>Budget ID</td>
<td>See <em>Use the Budget Code Lookup function</em> for details on populating this field.</td>
</tr>
<tr>
<td>Budget Phase</td>
<td>See <em>Use the Budget Code Lookup function</em> for details on populating this field.</td>
</tr>
</tbody>
</table>
| Comparison Budget ID | Enter an additional ID and Budget Phase for comparison.  
(only for organization hierarchy, not line item detail) |
| Comparison Budget Phase | Enter an additional ID and Budget Phase for comparison.  
(only for organization hierarchy, not line item detail) |
| Index             |                                                                      |
| Fund              | Wildcard (%) allowed                                                 |
| Organization      | Wildcard (%) allowed                                                 
(except for the Organization in Organization Hierarchy) |
| Account           | Wildcard (%) allowed                                                 |
| Program           | Wildcard (%) allowed                                                 |
| Activity          | Use a specific value including the wildcard (%).                     
You can use the wildcard (%) alone to indicate all values.  
Null matches null in the Budget Lines table. |
| Location          | Use a specific value including the wildcard (%).                     
You can use the wildcard (%) alone to indicate all values.  
Null matches null in the Budget Lines table. |

7. For the **Budget Duration Code** field, choose from:
   - Permanent budget
   - Temporary budget
   - All

8. For the **Display Financial Manager from** field, choose from:
   - None
   - Organization
   - Fund

9. Select any of these check boxes to include the following:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Revenue Accounts</td>
<td>If you select this check box, revenue accounts based on internal account type 50 are included in the query.</td>
</tr>
<tr>
<td>Labor Accounts</td>
<td>If you select this check box, labor accounts based on internal account type 60 are included in the query.</td>
</tr>
</tbody>
</table>
### Field/Description

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Expenses</td>
<td>If you select this check box, expenses based on internal account type 70 are included in the query.</td>
</tr>
<tr>
<td>Transfers</td>
<td>If you select this check box, transfers based on internal account type 80 are included in the query.</td>
</tr>
<tr>
<td>Deleted Items</td>
<td>If you select this check box, and <strong>Self Service Budget Development History</strong> is selected on FOASYSC, deleted rows will display in the query.</td>
</tr>
</tbody>
</table>

10. In the **Save Query as** field, enter a name for the query you have created, then click **Submit** to process your query and display the budget information.

11. Select the **Shared** check box if you want the query to be saved as a shared query.
   - A shared query can be retrieved by any user.
   - A personal query can be retrieved only by the user who created it.

### Related tasks

- **Use the Budget Code Lookup function**

### Use My Worksheets

**Updated: August 27, 2020**

You can select a Budget Worksheet on the My Worksheets page from your list of authorized worksheets that have budget lines present.

### Procedure

1. On the Budget Development page, click **My Worksheets**.
2. Enter your parameters as indicated in the following chart:

<table>
<thead>
<tr>
<th>Field/Option</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chart of Accounts</td>
<td></td>
</tr>
<tr>
<td>Budget ID</td>
<td>See <strong>Use the Budget Code Lookup function</strong> for details on populating this field.</td>
</tr>
<tr>
<td>Budget Phase</td>
<td>See <strong>Use the Budget Code Lookup function</strong> for details on populating this field.</td>
</tr>
</tbody>
</table>

3. Click **List Worksheets** to display your available worksheet choices for each different combination of Fund, Organization, and Program.
   - Result: The page displays all worksheets present for the parameters entered.
4. On the **My Choice** column, select the option corresponding to your worksheet choice.
5. Click **Submit** to open the selected budget worksheet.
What to do next

Use My Worksheets – detail method

Updated: August 27, 2020

On the My Worksheets page, you can access the detail method of starting a Budget Worksheet to revise your worksheet display parameters or create a new worksheet if there are no budget lines present.

Procedure

1. On the Budget Development page, click My Worksheets.
2. Select Add Worksheet.
   See the task Create a Budget Worksheet for information about entering the complete set of parameters to begin a Budget Worksheet.

Related tasks

- Create a Budget Worksheet

Create a Budget Worksheet

Updated: August 27, 2020

You can create a budget worksheet that accesses data in the Budget Line table (FBBBLIN). Although the worksheet can accommodate a maximum of 999 budget lines, you can enter different parameters to produce more manageable output.

About this task

These instructions apply equally to two scenarios:

- Defining a worksheet to open that has initialized budget lines or budget lines in progress, or both.
- Defining a worksheet to create new budget lines for a FOAPAL combination that had no budget lines present.

Procedure

1. On the Budget Development page, click Budget Development Worksheet.
2. On the Budget Development Worksheet page, choose one of the following:
• To create a new Worksheet Query, click **Create Query**.

or

• To retrieve an existing query, choose a saved query and click **Retrieve Query**.

3. If you are creating a new worksheet, choose the columns you want to display on the worksheet by selecting the appropriate check boxes, as summarized in the following chart.

Note: The Base Budget amount and current Proposed Budget amount are always included.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Adopted Budget</td>
<td>Original adopted budget for the Base Budget.</td>
</tr>
<tr>
<td>Permanent Budget</td>
<td>Permanent adjustments during the year for the Base Budget.</td>
</tr>
<tr>
<td>Adjustments</td>
<td>Temporary adjustments to the adopted budget for the Base Budget.</td>
</tr>
<tr>
<td>Temporary Adopted</td>
<td>Temporary adjustments to the adopted budget for the Base Budget.</td>
</tr>
<tr>
<td>Temporary Adjustments</td>
<td>Temporary adjustments to the budget during the year for the Base Budget.</td>
</tr>
</tbody>
</table>

4. Select the appropriate Chart of Accounts, Budget ID and Phase, Fund, and Organization to include on the worksheet.

Information about the choices on this page is summarized in the following table.

<table>
<thead>
<tr>
<th>Field/Option</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chart of Accounts</td>
<td>You can only use existing Budget IDs or phases as defined on the Operating Budget Maintenance (FTMOBUD) page. See <em>Use the Budget Code Lookup function</em> for details on populating this field.</td>
</tr>
<tr>
<td>Budget ID</td>
<td>You can only use existing Budget IDs or phases as defined on the Operating Budget Maintenance (FTMOBUD) page. See <em>Use the Budget Code Lookup function</em> for details on populating this field.</td>
</tr>
<tr>
<td>Budget Phase</td>
<td>You can only use existing Budget IDs or phases as defined on the Operating Budget Maintenance (FTMOBUD) page. See <em>Use the Budget Code Lookup function</em> for details on populating this field.</td>
</tr>
<tr>
<td>Index</td>
<td></td>
</tr>
<tr>
<td>Fund</td>
<td>You must have posting access at, or above, the fund and organization you are trying to view.</td>
</tr>
<tr>
<td>Organization</td>
<td>You must have posting access at, or above, the fund and organization you are trying to view.</td>
</tr>
<tr>
<td>Account</td>
<td>Wildcard (%) is allowed, or leave null to include all records.</td>
</tr>
<tr>
<td>Program</td>
<td>Wildcard (%) is allowed, or leave null to include all records.</td>
</tr>
<tr>
<td>Activity</td>
<td>Can use a specific value.</td>
</tr>
<tr>
<td></td>
<td>Null matches null in the Budget Lines table.</td>
</tr>
<tr>
<td>Location</td>
<td>Can use a specific value.</td>
</tr>
<tr>
<td></td>
<td>Null matches null in the Budget Lines table.</td>
</tr>
</tbody>
</table>

5. For the **Budget Duration Code** field, choose from:
6. For the **Display Financial Manager from** field, choose from:
   - None
   - Organization
   - Fund

7. Select any of these check boxes to include the following:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Revenue Accounts</td>
<td>If you select this check box, revenue accounts based on internal account type 50 are included on the worksheet.</td>
</tr>
<tr>
<td>Labor Accounts</td>
<td>If you select this check box, labor accounts based on internal account type 60 are included on the worksheet.</td>
</tr>
<tr>
<td>Expenses</td>
<td>If you select this check box, expenses based on internal account type 70 are included on the worksheet.</td>
</tr>
<tr>
<td>Transfers</td>
<td>If you select this check box, transfers based on internal account type 80 are included on the worksheet.</td>
</tr>
<tr>
<td>Deleted Items</td>
<td>If you select this check box, and <strong>Self Service Budget Development History</strong> is selected on FOASYSC, deleted rows will display on the worksheet.</td>
</tr>
<tr>
<td></td>
<td>If you do not select this check box, any deleted items will be included in the summary line only.</td>
</tr>
</tbody>
</table>

8. In the **Save Query as** field, enter a name for the query you have created.

9. Select the **Shared** check box if you want the information you entered in the **Save Query As** field to be shared.

   A shared query can be retrieved by any user.

   A personal query can be retrieved only by the user who created it.

10. Click **Submit**.

    Result: The system verifies the validity of the entered FOAPAL, Budget ID, and Budget Phase, and displays the budget information.

### Results

The worksheet displays all budget lines present for the parameters entered.

Change a Budget Worksheet
Updated: August 27, 2020

You can modify a worksheet by deleting specific rows, associating text with specific line items. You can also make changes to specific line items.

About this task

For information on budget line changes, see Mass Change Parameters (and Line Item Changes).

Related concepts

- Mass Change Parameters (and Line Item changes)

Delete rows
Updated: August 27, 2020

You can delete rows in a worksheet.

Procedure

1. To delete rows from the worksheet:
   a) Select the **Delete Record** check box.
   b) Click **Calculate**.
      Result: This changes the balance to zero and marks the row for deletion.

2. Select **Post** to delete rows marked for deletion.
   Result: After deleted rows have been posted, if **Self Service Budget Development History** is enabled on the System Control Maintenance (FOASYSC) page, a record is written to the Budget Line Audit History (FBRAUDT) table.

3. Select the **Deleted Items** check box on the query criteria page.
   Result: This includes detailed information about a deleted record on your worksheet.
   If you did not include Deleted Items in your worksheet, a summary by account type that includes deleted rows displays at the bottom of the worksheet page section.

Add free-form text to budget lines
Updated: August 27, 2020
You can add free-form text to any budget line item on the worksheet.

Procedure

1. On the Budget Development Worksheet, select the account code link.
   Result: The **Budget Development Text** page displays.
2. Enter text in the appropriate box and click **Save**.
   After you enter text for a record, the **Text** column on the worksheet changes from **No** to **Yes**.
   You can access the text from the account code link and make additional changes.

Set up an Organization Lock

**Updated: August 27, 2020**

You must have posting authority to a predecessor organization to be able to access or change the lock status of an organization.

Procedure

1. On the Budget Development page, click **Maintain Organization Locks**.
2. Enter the parameters indicated in the following chart.

<table>
<thead>
<tr>
<th>Field/Option</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chart of Accounts</td>
<td></td>
</tr>
<tr>
<td>Budget ID</td>
<td></td>
</tr>
<tr>
<td>Phases</td>
<td>Click <strong>Default Phases</strong> to default existing phase information from the Budget ID.</td>
</tr>
<tr>
<td></td>
<td>To enter a combination of your own phase information and default information, click <strong>Default Phases</strong> before entering phase information.</td>
</tr>
<tr>
<td></td>
<td>Depressing this button overwrites any data that already exist in these fields.</td>
</tr>
<tr>
<td></td>
<td>A warning is displayed if the budget phase combination is closed. You will still be able to update the status of the organizations for this combination.</td>
</tr>
<tr>
<td>Organization</td>
<td>Enter an organization or leave this field blank to retrieve the highest-level organizations for which you have authority. If you enter an organization here, the lock page will start as follows:</td>
</tr>
<tr>
<td></td>
<td>• With this organization if you have the authority</td>
</tr>
<tr>
<td></td>
<td>• With all the immediate successor organizations if you have Posting authority for that organization, but not higher</td>
</tr>
<tr>
<td></td>
<td>• With an error if you do not have authority</td>
</tr>
<tr>
<td>Status</td>
<td>Choose Locked, Unlocked, or All.</td>
</tr>
</tbody>
</table>

If you choose a status, only records matching that status display. If you drill down through the hierarchy and do not see the records you
3. Click **Submit**.
   Result: A summary page displays the parameters you selected and the organization's lock status.

4. You can change the status of each phase that appears in the Organization Lock Status section.
   a) Click **Review** to look over the parameters and your pending changes.
      You can make additional changes by using the back button on your browser and redoing your selections. You can continue to toggle back and forth and make additional changes until you are satisfied with the results.
   b) Click **Update** to apply your change to the database.

**Review History**

**Updated: August 27, 2020**

To review the history for a budget line item, choose the link for a Proposed Budget amount from the Budget Development worksheet or from the budget query page labeled **Line Item Detail**.

Review History is available from three pages:

- Budget Development Query > Organization Hierarchy Account Detail
- Budget Development Query > Account Detail
- Budget Development Worksheet > Account Detail

**Use the Budget Code Lookup function**

**Updated: August 27, 2020**

You can look up Budget ID and Budget Phase codes from these pages — My Worksheets, Budget Development Query, or Budget Worksheet.

**Procedure**

1. Depending on what page you are on, access the modal lookup window for Budget ID and Phase by clicking the budget codes **Look up** button.
2. On the Code Lookup modal window, enter criteria based on the following conditions.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chart of Accounts</td>
<td>Required field.</td>
</tr>
<tr>
<td>Budget ID Criteria (code)</td>
<td>Use exact match or with wildcards % and _.</td>
</tr>
<tr>
<td>Field</td>
<td>Description</td>
</tr>
<tr>
<td>----------------------------</td>
<td>--------------------------------------------------</td>
</tr>
<tr>
<td>Budget ID Title Criteria</td>
<td>Case sensitive; use exact match or with wildcards % and <em>.</em>.</td>
</tr>
<tr>
<td>Budget Phase Criteria (code)</td>
<td>Use exact match or with wildcards % and <em>.</em>.</td>
</tr>
<tr>
<td>Budget Phase Title Criteria</td>
<td>Case sensitive; use exact match or with wildcards % and <em>.</em>.</td>
</tr>
</tbody>
</table>

3. Click **Execute Query**.
   Result: This displays the Code Lookup Results window with a list of valid budget code combinations for Budget ID and Budget Phase.

4. Select a **Budget Phase** code to return the value to the parameter page.
   Alternately, you can exit without value to return without a value.

5. Click **Another Query** to return to the Code Lookup page.

Use Extensibility in Budget Development

Updated: August 27, 2020

You can hide optional page elements or change elements field labels using the Extensibility tool set delivered with the application.

About this task

Use the **Extension Editor**, accessed in **Budget Development Tools** menu, to configure which elements you want to modify. When the extensions are edited and saved, this configuration is applied uniformly across your site’s Budget Development implementation.

Only users who have a Web Tailor admin role can use the extension editor. For more information about this role, refer to the Finance Web app extensibility section in the **Banner Finance Self-Service Install** documentation.

Note: The budget_development.json file is included with the release documentation on the Ellucian Documentation site. To download the file, navigate to the **Banner Finance Self-Service Configure** documentation, **Use Extensibility in Budget Development** topic, click **More** 📦, then **Attachment**, and select the file to download.

Procedure

1. Log in to Budget Development using the Web Tailor Admin role.
2. Click **Tools** and select **Extensibility > Edit Extensions.**
   
   Result: The **Extension Editor** window appears.

3. For the element for which you want to change the label, modify the label in the corresponding JSON code in the **Extension Editor** window as shown in the following examples:
   
   If you want to change the label from **Public Comment** to **Printable Comment**, the following JSON code must be modified as follows:
   
   ```json
   {"label":"Public Comment"}
   ```
   
   to
   
   ```json
   {"label": "Printable Comment"}
   ```

4. Use the **exclude** value to specify that an element is displayed or hidden.
   
   - "**exclude**:true hides the element
   - "**exclude**:false displays the element

5. Based on the needs of your institution, use the JSON files supplied for all possible extensible elements in **Budget Development**.
   
   You can mix and match sections of the JSON code contained in the provided **budget_development.json** file.
   
   After the JSON returns modifications, make sure they are valid by verifying against any of the available JSON validators.
   
   For example:
   
   - [http://jsonlint.com/](http://jsonlint.com/)
   - [https://jsonformatter.curiousconcept.com/](https://jsonformatter.curiousconcept.com/)

<table>
<thead>
<tr>
<th>Query Type</th>
<th>Use JSON Code File</th>
</tr>
</thead>
<tbody>
<tr>
<td>Budget Development</td>
<td>budget_development.json</td>
</tr>
</tbody>
</table>

6. Click **Submit** to save the extension.
   
   Result: A notification center message appears verifying the extension was saved.

7. Refresh the page to verify your changes were made.

**Delete Finance Template**

*Updated: August 27, 2020*

Delete Finance Template is an option on the My Finance menu that enables you to delete templates or queries.

This can be helpful when you rename templates and want to remove the original through the user interface. The ability to delete templates depends on the privileges associated with your user ID.

**Delete Finance Template tasks**

*Updated: August 27, 2020*
If you are a Finance user assigned the Finance Data Tailor Role, you can delete your own and others’ templates or queries, both shared and personal. If you are a Finance user not assigned the Finance Data Tailor Role, you can delete only your personal templates or queries.

About this task

Use the following steps to delete templates or queries:

Procedure

1. Select the Delete Finance Template option from the menu.
   Result: A page displays where you can enter parameters. The parameters differ, depending on your user privileges.

2. Enter the desired information for each parameter described in the following chart:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>User ID</td>
<td>User ID associated with the query or template you want to delete. The default value is All. This field displays only for users assigned the Finance Data Tailor Role.</td>
</tr>
<tr>
<td>Template/Query Name</td>
<td>Name of the template or query that you want to delete. You can use a wildcard (%) in this field if you know only part of the name. For example, enter %PO% to display templates or queries whose name contains the text string PO.</td>
</tr>
<tr>
<td>Template/Query Type</td>
<td>Type of template or query that you want to retrieve. For example, select Purchase Order from the pulldown list to display templates or queries for purchase orders.</td>
</tr>
<tr>
<td>Shared</td>
<td>Shared indicator.</td>
</tr>
<tr>
<td></td>
<td>• Yes = Display only shared templates or queries that meet the other entered criteria.</td>
</tr>
<tr>
<td></td>
<td>• No = Display only personal templates or queries.</td>
</tr>
<tr>
<td></td>
<td>• All = Display both shared and personal templates and queries. This field displays only for users assigned the Finance Data Tailor Role.</td>
</tr>
</tbody>
</table>

3. Click Submit Query.
   Result: The query results are added to the page display below the parameters.

4. Select the Delete check box for each template or query you want to delete, or use Select All to mark all templates and queries for deletion.

5. Click Delete to permanently delete your selections.

Use Extensibility in Delete Finance Template

Updated: August 27, 2020
You can hide optional page elements or change elements field labels using the Extensibility tool set delivered with the application.

About this task

Use the Extension Editor, accessed in Delete Finance Template Tools menu, to configure which elements you want to modify. When the extensions are edited and saved, this configuration is applied uniformly across your site’s Delete Finance Template implementation.

Only users who have a Web Tailor admin role can use the extension editor. For more information about this role, refer to the Finance Web app extensibility section in the Banner Finance Self-Service Install documentation.

Note: The delete_finance_template.json file is included with the release documentation on the Ellucian Documentation site. To download the file, navigate to the Banner Finance Self-Service Configure documentation, Use Extensibility in Delete Finance Template topic, click More then Attachment, and select the file to download.

Procedure

1. Log in to Delete Finance Template using the Web Tailor Admin role.

2. Click Tools and select Extensibility > Edit Extensions.

   Result: The Extension Editor window appears.

3. For the element for which you want to change the label, modify the label in the corresponding JSON code in the Extension Editor window as shown in the following examples:

   If you want to change the label from Public Comment to Printable Comment, the following JSON code must be modified as follows:

   ```json
   {"label":"Public Comment"}
   to
   {"label": "Printable Comment"}
   ```

4. Use the exclude value to specify that an element is displayed or hidden.
   - "exclude":true hides the element
   - "exclude":false displays the element

5. Based on the needs of your institution, use the JSON files supplied for all possible extensible elements in Delete Finance Template.

   You can mix and match sections of the JSON code contained in the provided delete_finance_template.json file.

   After the JSON returns modifications, make sure they are valid by verifying against any of the available JSON validators.

   For example:
   - http://jsonlint.com/
   - https://jsonformatter.curiousconcept.com/
<table>
<thead>
<tr>
<th>Query Type</th>
<th>Use JSON Code File</th>
</tr>
</thead>
<tbody>
<tr>
<td>Delete Finance Template</td>
<td>delete_finance_template.json</td>
</tr>
</tbody>
</table>

6. Click **Submit** to save the extension.  
   Result: A notification center message appears verifying the extension was saved.

7. Refresh the page to verify your changes were made.
